### ASSESSORS FIX TAX EQUALIZING FACTOR AT 37%

#### Vote to Slash Bills Despite City Plea.

BY CARL WARREN.

(Picture on back page.)

Lower tax bills for Chicago property owners this fall appeared to be assured yesterday when the county board of assessors established 37 per cent as the equalization factor to be used in fixing assessed property valuations for 1929.

The board officially approved the 37 per cent factor despite a last minute plea from the city hall, which is hard pressed for cash, that its action will plunge the corporate fund into a deficit of \$12,548,242 at the end of the year. Such a deficit, City Controller Schmidt told the board, will force drastic reductions in expenditures by city departments next year.

#### Conroy Votes No.

The board's vote on the equalization figure was 4 to 1. Assessor John E. Conroy, the only Democratic member, voting no. Those voting yes were Chairman Charles Kruttschnitt, Charles Ringer, Gene Oliver, and Adam Wolf. While the 37 per cent order came as a blow to the tax spending agencies, the assessors believe it will be welcomed by the majority of Chicago property owners, who, if it is upheld by the board of review, will receive a reduction of between 18.1 and 21.4 per cent on their real estate taxes when they receive their balanced tax bills.

#### Malone Praises Action.

"The city hall, the sanitary district, and other tax eaters have been going wild with extravagance and this cut in their revenue should go far in curbing graft and padded pay rolls," Mr. Malone declared. "The assessors deserve the thanks of every Chicago taxpayer for their courageous stand in this issue."

#### The significance of the equalization factor was emphasized by Harry S. Cutmore, director of the revaluation program.

He pointed out that the 37 per cent value, which will be used as assessed valuations against which the tax rate will be placed. The total market value of Cook county real estate has been set at \$9,500,000,000 in the revaluation just completed. Thirty-seven per cent of this will produce approximately the same total assessed value as under the 1927 quadrennial valuation. This old total was \$3,555,232,551.

#### Budgets Based on Increase.

The predicament of the tax spenders is caused by the fact that they expected a big increase and have spent accordingly. According to Mr. Schmidt, the city corporate budget for 1928 was based on an anticipated increase of \$100,000,000 in assessed valuations, while the 1929 budget was anticipated at \$200,000,000. If the 37 per cent figure remains unchanged, the anticipated 1929 increase will not materialize, while that for 1929 will be highly problematical. The extra money looked for and spent in advance by the city administration probably will stay in the pockets of the taxpayers.

#### Act with Little Discussion.

Little discussion preceded the equalization factor vote, the entire meeting occupying less than a half hour. Hayden Bell, attorney for the county board, explained the legal significance of the action the board was about to take. Determination of the figure, he said, should not be based on the valuation of 1927 nor upon what would happen to the tax spending bodies, but solely upon a fair assessed value in comparison with the values of other counties. In this view C. C. Carnahan, attorney for the board, concurred.

Mr. Cutmore then stated that 37 per cent, in the light of all evidence collected, was the most logical. Tabulations made by the Illinois Agricultural Association and other groups showed the average downward to be almost exactly that, he said.

"I believe the board of assessors has done everything possible to ascertain a real perspective downward," commented Mr. Kruttschnitt. "The general average has been 37 per cent and I see no reason why we should not adopt that figure."

At that point Mr. Kruttschnitt (Continued on page 2, column 2.)

### DEGREES SOLD, LICENSES, TOO, QUIZ REVEALS

#### Printer Tells How "Docs" Are Made.

Systematic forgery of diplomas from reputable schools was disclosed last night in the inquiry into the fake medical license ring. A confession was obtained which may involve several Chicago printing concerns in the forgeries, not only of the school diplomas but of state medical licenses as well, according to Patrick Roche, chief investigator for State's Attorney Swanson.

The investigation of the fake licenses has resulted in the indictment of W. H. H. Miller, former head of the state license board, and others, on charges of conspiracy. Last night's confession revealed that some of the quacks who held forged state licenses had also purchased fake school diplomas from the forgery ring to bolster up their state credentials.

#### Owner of Plant Arrested.

The new disclosures followed the arrest of Jacob Crane, until four months ago the owner of a Springfield printing plant. Roche announced that from Crane and others he had learned not only the source of the spurious certificates but also the method of manufacture. Crane was seized at his home, 1827 Ridgeland avenue, Chicago, by Sgt. Michael Ahern of the state's attorney's staff, on a tip believed to have been given by the wife of an ambitious dupe who paid the ring \$15,000 for a forged medical license and \$5,000 for a forged diploma of Rush Medical college. The identity of the tipster's husband, who claims he never tried to practice, was suppressed by Roche's order.

#### Full Confession Reported.

The former Springfield printer, under three hours' questioning by Assistant State's Attorney Charles Bellows, made a full and frank revelation of his part in the license ring, according to Bellows. He related the following purported account of his activity in forging operations: "About a year ago Harry Goldstein, known around Springfield as 'Senator Brown', came to my plant with a physician's license and ordered a photostatic copy. I made the copy and sent the plates to an engraver at Terra Haute. They didn't pay me much for my services." Soon afterward, Crane is reported to have said, he was approached by Albert Carl Barron, who, with Goldstein and three others, was named in the first batch of indictments returned against the ring by the grand jury. Barron submitted patently genuine diplomas of Rush Medical college and Northwestern university medical school, also an interne's certificate from the Cook county hospital.

#### Admits Making Copies.

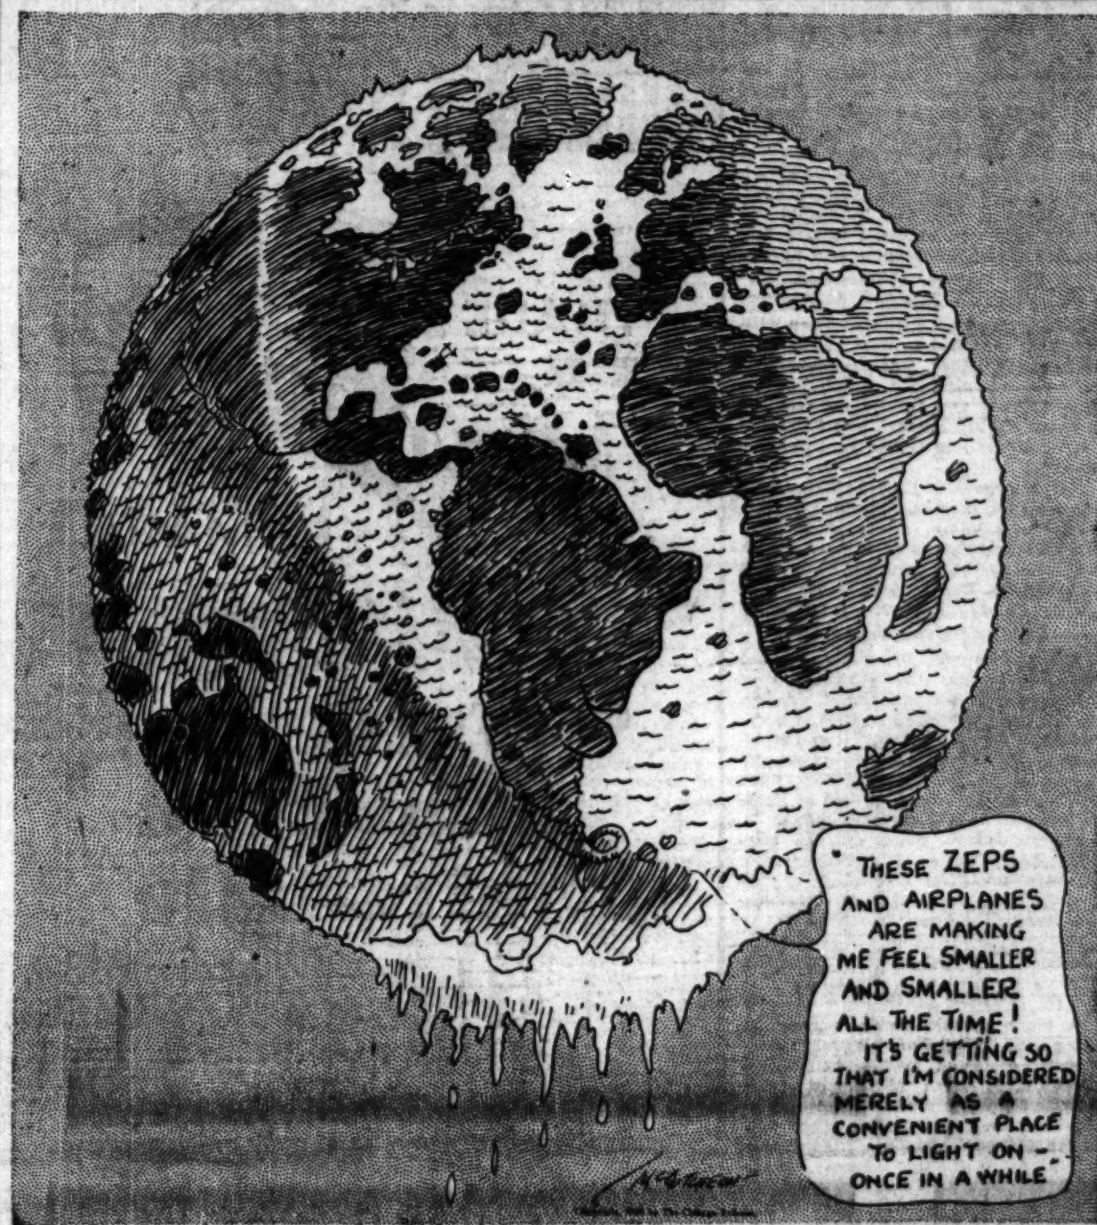

Crane claimed ignorance of how the diplomas were obtained, according to Roche. He admitted making photostatic copies of each of the three certificates, however, and sending the plates to the Terra Haute engraver. Several weeks elapsed and the operators of the ring looked about for an engraving plant where spurious seals might be manufactured to attach to the forged diplomas, according to Roche. Several Chicago engraving concerns undertook the job, showing their wariness by charging ten times the ordinary price for the seals. Previous to his indictment, Barron admitted having placed the forged seals and plates in a safety deposit box, according to Roche. But when Barron was released on bond following his indictment and arrest, he seized the opportunity to toss the incriminating evidence in the drainage canal at Western avenue and Pershing road, according to the story he told the investigator.

#### Plan to Drag Canal.

But Roche, doubting Barron's story of the drainage canal incident, planned to have the canal bottom dragged up. If the search does not reveal the plates, Roche says he hopes Barron may be persuaded to alter his story and perhaps produce the seals, which the prosecutors consider vital to their case. Miller may surrender today, according to his attorney, Samuel Hoffman, who called at the state's attorney's office last night. Hoffman will demand a \$30,000 bond for his client's release, he said. In the grand jury report, Miller was indicted as the principal conspirator in the license ring.

## New Parley to Solve War Aftermath

THE CHANGING WORLD

### Speeding Auto Kills Woman, 10 Die in Day

A heavy sedan of doubtful ownership, racing north on the wrong side of Cicero avenue last night, crashed head-on at Division street with a lighter car that was moving south at moderate speed. Both machines overturned and Mrs. Mabel Potter, 28 years old, 4223 Congress street, one of five old passengers in the smaller car, was crushed to death. Two men crawled out of the sedan wreckage and escaped afoot in the confusion of removing the four injured victims to St. Ann's hospital.

Three hours later, on information volunteered by a Checker cab driver, Police Sgt. John B. Foley arrested Myron O'Donnell of the "Klondike" O'Donnell gang and Edward Senik in the morning, 1225 South 51st street. With blood splattered clothes they hailed the cab at Cicero and Chicago avenues, a half mile from the scene of the fatal collision.

#### Refuse to Talk of Accident.

Both men were taken to the Austin police station, where they refused to talk except to demand lawyers. Meanwhile, at St. Ann's hospital, Richard Shuler, 21 years old, 925 South Euclid street, who had driven the sedan, was killed in the collision, was believed small car in the collision. Three others were severely injured, including a 10 year old girl, whose left leg was fractured.

With Mrs. Potter's death and two others last night Cook county's traffic toll for the year reached 502, while the fatality list for the last 24 hours stood at ten. The victims: John Vician, 24 years old, a machinist, of 925 Willis street. He died in the North Avenue hospital shortly before midnight of a skull fracture inflicted by a motorist who rolled up over the curb at the northeast corner of Milwaukee and Willis street, ran waukegan avenue and Willis street, and crashed into a light over Vician, who was posted early pole. A police guard was posted early pole. At the home of Steve Shuler, 1511 West Superior street, the suspected driver.

Albert Curtis, 43 years old, a street car conductor, of 1049 South Park avenue. He died in the Englewood hospital following a leg amputation hospitalized after he was run down July 21 at Halsted street and 38th place by William Seefeld, 2514 North Tripp avenue.

Luke Morley, 64 years old, 4448 McLean avenue. He died in the Keystone hospital of injuries suffered last Saturday in front of 4626 Armitage avenue. The driver was George Saleman, 2502 Potomac avenue.

June Gates, 4 years old, 409 South

### Battles Dry Spy; Leaves Him in River

Detroit, Mich., Aug. 5.—(AP)—Admitting that he left a prohibition boarder patrol agent foundering in the Detroit river after a struggle in which both men were carried from a boat into the water, John M. Heath, wealthy elevator engineer, tonight said he would surrender tomorrow to federal authorities in connection with the presumed drowning of the officer.

#### Swims Back to Shore.

Heath swam back to the boat, he said, but he never saw Sandlands. Although police dragged the river, Sandlands' body was not found.

#### Both Fall Into Water.

Both fell into the water, Heath said, and released their grips. Heath swam back and boarded his boat, the Maxine, he declared, and drove the craft away. He believed the agent would have no difficulty getting to shore, he said, and devoted all his attention to removing his boat from the range of possible gunfire.

#### Canada Bans Chicago

#### Jawa-Slav Labor Paper

OTTAWA, Ont., Aug. 5.—(AP)—A memorandum was issued today by the department of national revenue prohibiting the importation into Canada of the newspaper Radnik (The Worker), published in Chicago.

### Seize Broker's Books; Charge \$500,000 Loss

Records of J. B. Greenfield & Co., 310 South Michigan avenue, stock and bond brokers, were seized last night by Assistant State's Attorney Arthur Carlsen, following the investigation of complaints that the concern has defrauded customers of more than \$500,000. A warrant charging embezzlement was issued by Municipal Judge George B. Holmes.

The warrant was sworn out by Miss Anna Horner, niece of Judge Henry Horner, one of the victims of the alleged fraud. It was stated also that she had persuaded friends—some of whom were in charge of widow's estates and other fiduciary funds—to place investments with the company. Legal action was taken after Greenfield had failed to keep a promise to place \$500,000 in the hands of Carlsen by noon yesterday to make good on securities not delivered. A subpoena duces tecum was then issued for the company's records.

#### Agents in Michigan, Illinois.

In recent months the concern has been dealing exclusively in Trustee Standard Oil shares at approximately \$14.75 a share. It has more than 200 places covering almost every county in Michigan and many in Illinois. The stock is being floated by Dwyer-Pearce & Co. of New York and is being handled by 25 firms in Chicago. Because of the embezzlement charges, the Dwyer-Pearce company has canceled its contract with the Greenfield concern.

#### Estimate Fraud at \$531,000.

Acting on the complaints, Carlsen made an examination of the company's books and learned that \$425,000 worth of shares had been sold without delivery. Approximately \$366,000 in cash had been accepted from customers. An additional \$185,000 had been accepted by the Detroit office of the company. The amount of the fraud is approximately \$531,000, Carlsen estimated. No trace of the missing money was discovered.

#### Greenfield Doubtless Acted in Good Faith in the Beginning.

"We learned that he spent \$58,000 in five weeks to train salesmen.

#### Difficulties Become Greater.

"Two weeks ago Greenfield went to Detroit, sending the Detroit manager, a Mr. Kilgus, here to adjust things. The Detroit office had been operating at a profit. Once in Detroit, Greenfield got in further difficulty by sending to Chicago \$155,000 from Michigan subscribers. Dwyer-Pearce & Co. were not aware of these acts, inasmuch as they could not know of the disappearance of the money.

#### Continued on page 4, column 1.

### 12 NATIONS MEET AT HAGUE TODAY IN AIR OF GLOOM

#### Battle Looms Over Young Plan.

BULLETIN.

THE HAGUE, Aug. 6.—(AP)—The conference of the governments to determine how the Young committee's reparations plan shall be applied and to attempt solution of other problems growing out of the world war convened today at 11 a. m. in the hall of the first chamber of the Dutch States general in Medieval Binnenhof, Henri Jasper, premier of Belgium, presided.

#### BY HENRY WALES.

(Chicago Tribune Press Service.)

THE HAGUE, Aug. 6.—(AP)—This is in readiness for the opening tomorrow of the conference of leading statesmen of 13 world powers to "liquidate" out standing war problems.

The following nations are represented: Great Britain, France, Germany, Belgium, Italy, Japan, Roumania, Poland, Greece, and Portugal. The United States will sit in as an observer (C. Harris & Swiss Press.)

#### Three Main Problems.

The three main points for discussion are:

First, adoption of the Young plan to supersede the Dawes plan for reparations.

Second, allied military evacuation of the Rhineland.

Third, establishment of a committee of conciliation and control to supervise the demilitarized zone of Germany 50 kilometers (about 30 miles) wide along the western frontier separating it from France and Belgium.

Although the chief representatives of the powers are optimistic, each question presents serious difficulties.

The British Labor government opposes the provisions of the Young plan, which reduce England's share in the reparations under the "five quotas." London's share is cut from 22 per cent to 15 per cent.

The French seek to delay withdrawal from the Rhineland as long as possible.

Germany is against setting up any new commission empowered to interfere in international questions regarding the reparations, while the league of nations control is sufficient.

#### Agrees in Principle.

Foreign Minister Stresemann, however, agreed on the conciliation committee at Geneva last September in principle, and it is expected that Germany eventually will consent to this body acting until 1935, when the Versailles treaty stipulates that the occupation shall end.

Poland, Czechoslovakia, Roumania, and other small powers are sending emissaries to protest against their reparations "being compressed," which is necessary under the new scale of annuities.

Edwin Wilson, first secretary of the American embassy in Paris, will act as unofficial observer for the United States.

#### France Fears "Dirty Deal."

(Chicago Tribune Press Service.)

PARIS, Aug. 6.—The departure today of French Minister of Finance Louis Loucheur for the international conference at The Hague was gloomily hailed by Parisian political circles as the preliminary of "another dirty deal for France."

The Young plan provides for France getting much less than its due, according to general sentiment, while the ratification of the debts to America and England is still considered to have been extorted from France "while a knife was at its throat."

Italy in French hands.

(Chicago Tribune Press Service.)

ROME, Aug. 5.—The Hague reparations conference is opening tomorrow.

The month just ended gave the Chicago Tribune, daily and Sunday, the highest average circulation of any July in Tribune history—

854,893 Daily  
1,107,469 Sunday

CHICAGO TRIBUNE  
The World's Greatest Newspaper

in a cloudy atmosphere hampered by seemingly insurmountable obstacles, which leave slender grounds for optimism regarding the outcome, is the prevailing view expressed here tonight.

It is pointed out that all the countries are entering the conference with an intransigent attitude, each prepared to insist unflinchingly on its claims, while the United States has washed its hands of European affairs, contenting itself with the appointment of a mere secretary of the embassy as an unofficial observer.

It is believed here the conference is just as likely to constitute another diplomatic episode in postwar adjustment, as that it should prove to be the last of the series of conferences surrounding the war and the first of the new regime inaugurating world peace.

Italy in any case, it is indicated, will not recede an inch from the advantage gained in obtaining a larger figure of percentages from the Young plan, despite the anticipated British action in contesting this revision.

### 3 SIGN FOR ZEP WORLD TOUR AT \$9,000 A TICKET

All Ready to Sail Away at  
Midnight Wednesday.

(Pictures on back page.)

Lakehurst, N. J., Aug. 5.—[Special.]—The ticklish task of replenishing the fuel and lifting gas of the hydrogen-filled Graf Zeppelin was begun in the naval hangar here today in preparation for the round world flight on which the veteran of three ocean crossings is scheduled to start at midnight Wednesday.

Three persons are known to have booked passage for the trip around the world at \$9,000 apiece. They are Joachim Rickard, a writer of Madrid, Spain, who arrived here Sunday on the Zeppelin; Otto Hillig, a photographer of Liberty, N. Y., who is returning to Germany for the first time since he emigrated 35 years ago, and a third man whose name was withheld. Eighteen have booked passage to Friedrichshafen at \$2,000 each.

Booked for Return Trip.

Two New Yorkers will be aboard when the great air liner rises and turns homeward, but they have not decided whether to terminate their journey at Friedrichshafen or continue around the world. They are William Weber, part owner of the Pico Hotel, and Nathan Wexler, proprietor of the Palace Hotel. Wexler is paying the fare for both. He lost a golfing bet to Weber and the trip was the stake.

Others who will make the trip to Friedrichshafen include Morris Shumsky, New Rochelle, N. Y., bread manufacturer; Herman Schlacter, proprietor of a cafe in Philadelphia; Dr. Walter Spiess of the German ministry of transportation and Dr. Leisler Kiep, managing director of the Hamburg-American line.

The weather, apparently, is the only possible obstacle to the flight, and Dr. James H. Kimball, government meteorologist of New York, said an accurate forecast of conditions cannot be made until Tuesday afternoon.

Postal authorities announced that mails for the Zeppelin's cruise would close Wednesday at 2 p. m. Lieutenant Commander Zeno Wicks assured Dr. Hugo Eckener, the commander, that the refueling operation of which he has charge will be completed by noon of that day. More freight than can be carried has been offered to the Zeppelin.

Plans to Refuel at Tokyo.

Once back at Friedrichshafen the circumnavigation of the globe, a jaunt Dr. Eckener estimated roughly at 35,000 kilometers, actually will start, with stops for refueling at Tokyo and Los Angeles. The commander hopes to be back at Lakehurst Sept. 3.

Skilled mechanics tested the Graf's engines. Few repairs were needed, it was said. Sailors went over the outer skin of the airship carefully, patching rents and "doping" the fabric to tighten it. A couple of broken wire struts, used to brace the fragile frame

### ADMIRAL MOFFETT PRAISES ZEP, CHIDES U. S. FOR AIR NEGLECT

North Platte, Neb., Aug. 5.—[Editor of THE TRIBUNE.]—The Graf Zeppelin made the trans-Atlantic voyage over a much longer route in much less time than the Bremen.

The Germans, heavily in debt, are to be congratulated on their foresight, vision and sportsmanship in this pioneer work in the commercial use of airships. It is to be regretted that America, with all her wealth, is not leading today. Had we grasped our opportunity promptly, the six and one-half million cubic feet, helium filled dirigible now building for the navy would be flying today across the oceans and around the world.

We can recover our lead in this new field of airship transportation if we grasp our opportunity vigorously and show the same spirit that won the American cup and created the greatest merchant marine in the world in years past.

W. A. MOFFETT,  
Rear Admiral, U. S. A.

of the craft, were the only casualties inside the dirigible.

Replenishing of the Zeppelin's lifting gas was started this morning. More than 4,000,000 cubic feet of hydrogen were on hand to fill the depleted balloons, hidden under the "skin" of the dirigible. It was not enough. An extra 105,000 cubic feet were needed, and this amount was manufactured at the field and collected in free balloons holding 30,000 cubic feet apiece.

3,500 Gallons of Gasoline.

These were "walked" over to the giant air liner and weighted down with sandbags attached to nets tossed over their bulging sides. The gas was forced up into the airship. Simultaneously, 5,500 gallons of gasoline for starting her five mighty engines and 1,100 gallons of oil for lubrication were pumped aboard.

While a crowd of 100,000 visitors, who came by automobile, bicycle, airplane, bus and blimp, streamed through the hangar to gaze at the mammoth air liner and her smaller sister, the Los Angeles, Dr. Eckener strode about the air terminal supervising the work.

Regular Service Just Hope.

Busy as he was, Dr. Eckener found time to discuss the possibilities of trans-Atlantic airship travel. Sadly, he admitted published reports of preparations for a regular commercial service were founded "only in hopes."

He denied also negotiations were under way for a landing field at Richmond, Va., as was reported today.

Before future plans can be anything but a hope, Dr. Eckener said, bankers must be convinced of the practicability and safety of dirigibles. That will take time, he admitted.

Bomb Explodes in Front  
of Labor Leader's Home

A black powder bomb, believed to have been tossed from a moving automobile, exploded last night on the sidewalk in front of the bungalow home of John Sheridan, secretary of the Teamsters' district council, at 6147 South Artesian avenue. Mr. and Mrs. Sheridan are at their summer cottage at Lake Geneva. Several windows in the neighborhood were broken by the explosion. Damage was estimated at \$100.

### FRENCH SEE ZEP FLIGHT AS NEW GERMAN MENACE

[Chicago Tribune Press Service.]

PARIS, Aug. 5.—The Graf Zeppelin's second successful transatlantic flight is not important as a commercial aeronautical demonstration, but is a significant symbol of Germany's determination to become mistress of the air, according to Camille Aymard, editor of the nationalistic newspaper, La Liberte.

"Since the Germans are deprived of their boats and colonies, they are unable to repeat the Kaiser's words: 'Our future is on the water,' but they are saying to themselves: 'Our future is in the air,' and they are acting accordingly," he says.

"The so-called German commercial aeronautical factories receive encouragement from the government, and without appearing so, are really militarily organized."

### HEAT CONTINUES AT LOS ANGELES AND NEAR POINTS

Los Angeles, Cal., Aug. 5.—[Special.]—The third heat wave of the Los Angeles summer season kept the thermometer at or over the 90 mark for the third successive day today. While Los Angeles gasped at 91, points farther inland, such as San Bernardino, Riverside, and San Fernando, reported an even 100 degrees, and Pasadena sweltered at 95.

Record Drop at New York.

New York, Aug. 5.—[Special.]—The early hours of today saw a lot of pulling up of blankets, for the thermometer in and around New York began dropping after midnight and went on doing so until a record low temperature for Aug. 5 was established at 7 a. m., with 56 degrees.

Heat Sweeps Over Southwest.

Kansas City, Mo., Aug. 5.—[AP.]—A hot blast swept over the southwest today. Heat records were established in a number of cities as the mercury soared above the century mark. A scorching wind blew from the south. In Oklahoma City the mercury rose to 104 degrees. At Blackwell, Okla., a maximum temperature of 105 was recorded and Chickasha reported 107.

### SUMMER WANING; MARTINS GATHER FOR TRIP SOUTH

The purple martins, prophets of waning summer, are assembling for their migration south, according to north shore residents. But Washington park's colony of 10,000 is still there, with no apparent thought of vacating, park officials reported last night. However, another sign of fall is taking place, they said. Sycamore and chestnut trees are shedding their leaves, forecasting an early fall.

Two years ago the martins gathered on Aug. 16, but they did not wing south until Sept. 47. In 1934, north shore martins chose Aug. 12 to congregate on the Evanston Golf club links.

Refuel at Scott Field.

Scott Field, Ill., Aug. 5.—[AP.]—Nine army bombing planes on a cross-country flight from Langley Field, Va., to San Diego, Cal., landed here at 1:30 p. m., today and left 15 minutes later after refueling. Their only other scheduled stop is at Albuquerque, N. M.

Tests for Intelligent People:

When did crickets stand on every hearth?

Mediaeval chairs were built high from the ground in order that the Master's feet would not touch the cold stone floor, but would dangle rhythmically in mid-air or else rest comfortably upon a footstool. In those days, however, the footstool bore a different name—was called a "cricket." Its legs were seldom vertical, but usually played out slantwise—an interesting tradition scrupulously observed in the Danersk cricket pictured below.

Why has the furniture of Chippendale lasted so long?

LARGELY because of the sturdiness secured by mortise and tenon construction. In the case of a footstool, for example, each leg bears at its top a projecting piece known as a "tenon." By hand, this tenon is carefully fitted into a corresponding slot or "mortise" in the top of the stool. The same method is used in the earlier Windsor chairs, where tenons on the posts come clear through. Such painstaking hand-craftsmanship requires much time and great skill, and consequently is limited to such fine furniture pieces as the Danersk cricket pictured below.

Why did Hepplewhite say "Mahogany chairs should have seats of haircloth?"

WHEN the long silky hairs of the horse's mane are woven into multi-colored fabric, there results a material which has few equals either in charm or wearing qualities. Hepplewhite, with the exquisite taste which shows itself in every line of his furniture, was quick to perceive how richly haircloth would adorn a chair seat. The luxurious haircloth covering of the Danersk cricket pictured below has been used in the traditional manner made famous by Hepplewhite.

The Danersk cricket pictured above is made with long tenons that come clear through the posts. It is finished in mellow tones of old maple or English walnut, and covered with beautifully embroidered haircloth. Like all the hundreds of larger Danersk pieces, this cricket was made by our colony of Scotch and English craftsmen. Ordinarily, its cost would be around \$40.

Now, as the Danersk collector's piece for the month of August, it is specially priced at

## SEIZE BROKER'S RECORDS; CHARGE \$500,000 FRAUD

J. B. Greenfield Faces Embezzlement Action.

(Continued from first page.)

his transactions until they were brought to our attention.

"I got in touch with Greenfield by phone as soon as the complaints were made. He promised to deliver the securities. I gave him three chances to put up sufficient money to cover the deficit, and when he failed to do so, I acted. I will seek his indictment before the grand jury for embezzlement."

J. B. Greenfield & Co. was licensed three years ago. Until April 15 of this year the concern dealt in various securities. On that date the Trustee Standard Oil shares were qualified in Illinois and Greenfield arranged with Dwyer-Pearce & Co. to sell in this state and Michigan. The New York house, through its Illinois representative, Case Edwards, declines responsibility, holding that Greenfield was not their agent.

Mr. Edwards yesterday canceled

Greenfield's contract, automatically closing his offices. The Illinois Securities commission, headed by David H. Jackson, held up his authority to sell any securities pending the results of the investigation. Assistant State's Attorney Carleton will make a complete audit of the books to check the earlier findings.

Greenfield is 43 years old, married and lives at 6608 Newgard avenue. He attended the University of Michigan. His home was in Flushing, Mich. For sixteen years he was a national bank examiner, working in Michigan, Illinois, Indiana, Iowa, and Wisconsin. He incorporated his concern in 1927 with a capitalization of \$100,000.

## JAPANESE MINE BLAST KILLS 52, TRAPS 24 OTHERS

TOKIO, Aug. 5.—[Tuesday.]—Fifty-two bodies have been taken from the Sumitomo Bantan coal mine, which was wrecked by an explosion yesterday. It is believed that 24 other miners, trapped in the galleries and still missing, are dead. Of the thirteen who escaped, five were injured. The mine is at Otashina on the island of Hokkaido.

GROCERY STORE ROBBED. Three men yesterday entered the grocery store of Christ Dierckx at 559 East 63d street and took \$225.

## FORMER OFFICIAL GIVES SELF UP ON CHARGE OF THEFT

Fred T. Bassett, 38 years old, former treasurer of the village of Berlin, Wis., was held at the detective bureau last night for Wisconsin authorities, who hold a warrant charging him with embezzlement of \$5,000 of the public funds.

Bassett arrived at the Union sta-

tion last evening, broke after traveling over this country and Mexico since April 2. He telephoned Sheriff Walter Smith at Berlin and said he wanted to give himself up, but had no money to get home. The sheriff notified Commissioner Russell and a policeman was sent to the station to arrest Bassett.

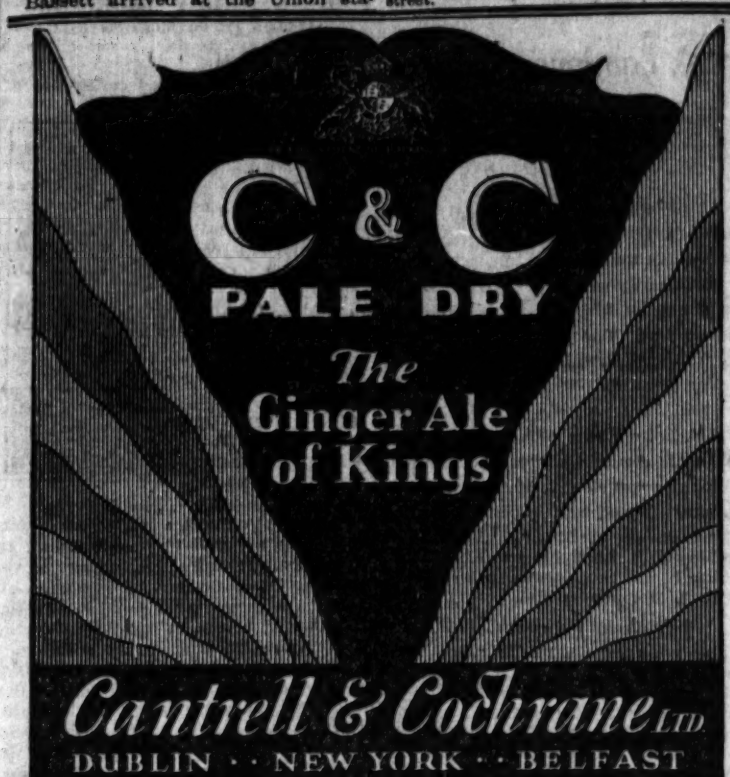

DETAILED ENGINE BLOCKS TRAINS. Traffic on the Illinois Central railroad was delayed a short time yesterday when a passenger locomotive was detailed near 16th street.

# CHICAGO GREET'S SILVER FLEET WITH BIG CITY HALL CEREMONY

## Guests of Cubs and Rotary Today

Local Traffic Survey Presented to Chicago Motor Club Yesterday—Visit Packers at Stock Yards

**Silvertowns in Prime Condition With 30 Tires Unpunctured After 21,000 Mile Battle With Nation's Roads.**

A Fleet of gleaming cars, dressed in spotless silver, rolled through yesterday morning's traffic... swung into perfect line... halted before City Hall. A command... and the uniformed athlete-pilots snapped smartly into formation. City officials stepped forward to greet them...

A Good-Will book appeared... the book that bears the greetings from the people of the West Coast to the people of the East. Local officials added their signatures... inspected cars, men, tires...

Then a farewell salute. Pilots slid behind their wheels. A signal blared... and the shining procession swung away on parade through city and suburbs.

The Silver Fleet... demonstrating Goodrich Tires to the whole nation... stopped to give Chicago tire-buyers a first-hand view of the 60 stock Silvertowns that have broken all records for sustained performance under actual road conditions.

### A Lesson to Tire Buyers

And what a story the Silver Fleet told of tire stamina... of the power to keep on going in the face of overwhelming odds. Its stock Goodrich Silvertown Tires have been on the road since January. More than twelve hundred hours of hard driving. More than twenty-one thousand miles of terrific punishment for tires.

Snow and mud and rain. Icy ruts that rip and cut. Sands that burn and blister. Rocky mountain roads. From New York to Georgia... from Florida to Texas... up the West Coast... Eastward again... searching out every kind of road that the land can offer.

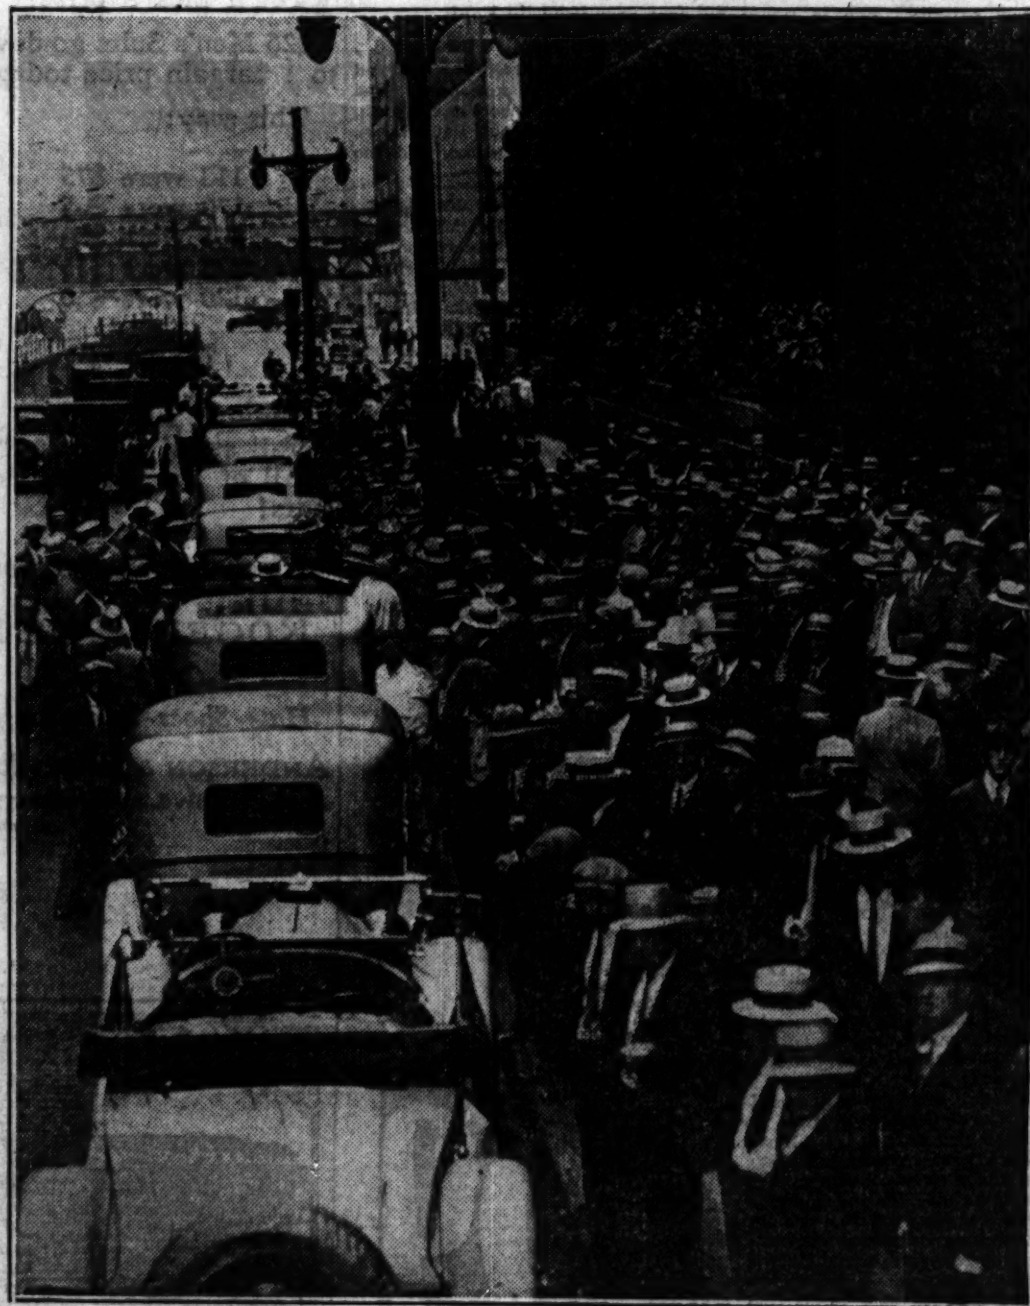

And yet when examined this morning by local motorists, 21 of these tires had never been off the rims! 30 had stood the trip without even a nail puncture.

And not a single failure had occurred in more than a million and a quarter tire miles!

Possibly you were not among the great crowds of people who saw the Silver Fleet yesterday...

Then don't miss it today. See it... on public display in front of City Hall from 12 to 2 this afternoon...

And don't forget. To commemorate the visit of the Silver Fleet to

WELCOME TO CHICAGO! Just look at that crowd on hand to see the Silver Fleet at the City Hall ceremony yesterday. Here Alderman George M. Maypole, chairman of the Convention Committee of the City of Chicago, as well as other officials, greeted Commander Schaeffer and his 19 college pilots. Everybody marveled at the splendid condition of these Goodrich tires that have already demonstrated outstanding durability in 21,000 miles of grueling road work.

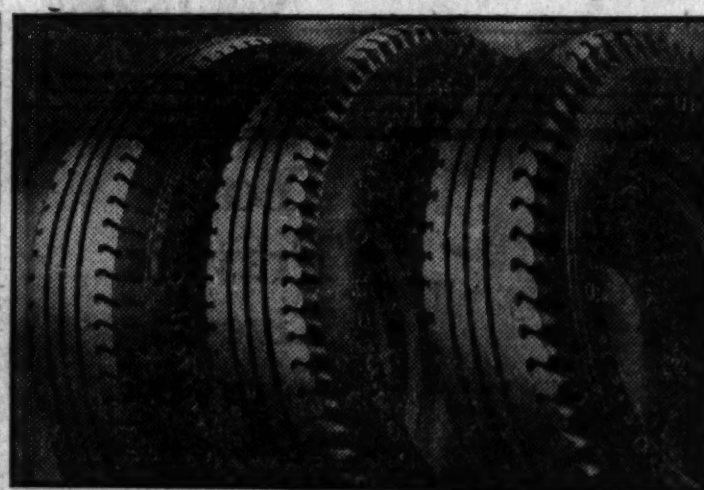

Chicago... local Goodrich dealers are now holding a special Silver Fleet Tire Sale.

### Look at These Prices!

Look at the prices shown in the box at the left. Remember these prices are for genuine Silvertown tires. Study them carefully... look for your size... don't they prove to you that Goodrich Tires are not expensive?

And always keep this in mind... every Silvertown that your Goodrich dealer shows you started with the same raw materials, passed through the same hands, emerged from the same molds as those now making tire history on the Silver Fleet.

The B. F. Goodrich Rubber Co., Est. 1870, Akron, O. Pacific Goodrich Rubber Co., Los Angeles, Calif. In Canada: Canadian Goodrich Co., Kitchener, Ontario.

THREE GOODRICH TIRES: (right to left) Silvertown De Luxe, for superlative style and service. The famous Silvertown—the standard quality tire—choice of millions of car owners. Goodrich Cavalier, a low-priced, high-quality tire for hard drivers and keen buyers.

## NOW GOING ON IN CHICAGO! SPECIAL SILVER FLEET TIRE SALE

Look at these low prices for tires just like those on the Silver Fleet!

ADVERTISE IN THE CHICAGO TRIBUNE

OHIO ST. PAVING  
BLOCKS TRAFFIC  
LANES INTO LOOPMichigan Ave. Only Way  
Left Entirely Open.

Entrance into the loop by motorists from the north side has been seriously hampered with every traffic lane between Lake Shore drive and Orleans street, with the exception of Michigan avenue, blocked by the Ohio street paving. This was disclosed by a survey yesterday.

The usual practice in paving streets which intersect heavy traffic lanes is to pave the street intersections alternately keeping half of them open, while the other half are being paved. The White Paving company, however, has closed all of the streets crossing Ohio street, leaving open only the street car lines on Clark, State, Franklin, and Wells streets.

**Leaves Single Lane.**  
As the streets are torn up on either side of the tracks, only a single line of traffic can pass. Motorists may cross also at La Salle street if they follow their pace to ease their automobiles across the poorly filled openings.

"Tearing up streets without informing the police traffic division has long been a source of annoyance," commented Capt. Frank Matthei. "We are never notified. Our information comes when we see workmen begin to tear up the streets and we then have to hurry men to the districts to manage the resulting traffic jams."

**Tied Up for Month.**  
Traffic has been held up at Ohio street for nearly a month. After the contractor had excavated the public utility companies began to put in underground work and the actual paving began only last week. The concrete base for the pavement has not been laid entirely, indicating that the street will be closed several weeks longer, as a surface layer of asphalt also is to be laid.

Blame Excavation for Slip  
in Wacker Drive Approach

City engineers yesterday were inspecting the La Salle street approach to Wacker drive which is said to have been weakened by the excavation for the proposed forty story building at the southeast corner of Wacker drive and La Salle street. The sand fill which supports the pavement of the approach to the drive has slipped, as a result of the excavation, and the pavement has caved in along the La Salle street side of the proposed structure, according to Lorin D. Gayton, city engineer.

## PROTEGE AS BOY

Wilbur Huston, victor in Edison contest to select protege, as he appeared at the age of three. Huston is from Port Huron, Wash., and is the son of a bishop.

PROMISES END OF  
RACE TROUBLE AT  
S. SIDE BEACHES

Hostility between the white and colored people at the Jackson Park bathing beach will be amicably settled, according to President Kelly of the south park board. The police at all beaches, he said yesterday, have been instructed to keep the situation under control and to report incidents of misconduct by either race.

There are beaches at Roosevelt road and at 31st street which colored bathers now use. Added facilities may be provided at 39th and 47th streets as soon as the south park board can obtain funds for their construction. All these beaches, Mr. Kelly pointed out, will be rendered obsolete as soon as the outer fringe of islands for the World's Fair are constructed.

WAUKEGAN ROAD  
PROBLEM PUTS  
GOVERNOR IN JAMMotorists Expect Him to  
Correct Gas Tax Fault.

Cook county pays for ONE-HALF and gets ONE-TWENTY-FIFTH of the state's highways.

BY HAL FOUST.

The appeals from Cook and Lake counties to place the Waukegan road, route 43-A, on the state's highway building program recall the unsuccessful fight that was waged by the metropolitan area against the enactment of the 1 cent gasoline tax.

James Simpson, president of the Chicago Plan commission, and other civic leaders opposed the measure with statistics to show that Cook county motorists would have to pay \$39,918,000 for downstate roads in the next thirty months. Gov. Emmerson, to quiet indignation, promised to give special attention to the highway problems of the metropolitan area. But now it is discovered that Waukegan road, one of the three principal arteries leading out of Chicago, is not included in the construction program for the next biennium.

**Who's to Blame? Motorists Ask.**  
Who's responsible? Motorists began to ask the question last Thursday when the tax became effective and they had to dig a little deeper in their pockets to pay filling station attendants. The question was asked with even more insistence when the public learned for the first time a few days ago that a technicality of the fuel tax law prevents any of the revenue from being used on Waukegan road. It has been presumed that this prohibition was accidental.

The bill was sponsored by Gov. Emmerson, and his inaction was a determining factor in bringing about the enactment of the measure. The Cook county delegation might have been successful in its efforts to amend

COURT IS GIVEN  
MASTER'S RULING  
ON DOG TRACKS

Master in Chancery Max Korshak yesterday submitted his report, in which he held dog racing with pari-mutuel betting is legal in Cook county, to Circuit Judge Fisher. The judge continued the hearing until tomorrow to allow time for arguments on objections to the report. He will give final decision on the legality of dog racing after the hearing.

Assistant State's Attorneys Leo La Rochelle and John E. Northrup were in court representing county officials. Attorney Lewis Jacobson appeared for the owners of the tracks. The preliminary report of the master recommending the issuance of a protective injunction to the tracks was submitted a week ago, after Circuit Judge Rush dissolved temporary protective injunctions.

The contempt citations against State's Attorney Swanson and Sheriff Traeger for raids made on the tracks while the temporary injunction was in force will also be heard tomorrow. The attorneys for the track will move for the adoption of the master's report and for a permanent injunction.

"Make Hair Grow  
while  
the sun  
shines"

AL KVALE, actor of Jinx,  
at the Oriental Theater

WHAT hair grows faster in the summer than at any other season is an established scientific fact. You can take advantage of this seasonal peculiarity by starting Thomas' hair and scalp treatment at once.

Your hair will respond more quickly to this famous proved method of treatment now than at any other time. Within an unusually short time your dandruff will disappear, hairfall will stop, and new hair will actually be visible on the thin and bald spots. Call at the Thomas' office and talk your problem over with the specialist in charge. He will gladly examine your scalp without charge or obligation and frankly tell you what Thomas' treatment can do for you.

## DEBATED POINTS IN TRANSIT PLAN STILL UNSETTLED

Seven Weeks of Dickering  
Bring No Agreement.

BY OSCAR HEWITT.

Seven weeks have elapsed since Gov. Emmerson signed the enabling transit legislation, and not one important controversial point in an ordinance franchise has yet been settled.

The lawyers for the companies and the city have spent a week drafting sections of an ordinance on which there is little or no difference of opinion. They hadn't half completed this job when they started their second week on it yesterday afternoon.

### Order Financial Plan.

The aldermanic subcommittee, at a "confab" yesterday noon, instructed Maj. R. F. Kelker Jr., its engineering expert, to prepare a financial plan for the proposed new consolidated company. He is to assume certain rates of return, a fixed plan for amortization, compensation to the city, reserves for damage claims against the company and for renewals and depreciation to the property. When it is completed, which it is hoped will be tomorrow afternoon, the representatives of the present companies will be asked to point out its defects.

"Is it the hope of the aldermen that the financial plan evolved will be acceptable to the companies?" the councilmen were asked.

### Return Rate a Problem.

"The companies have refused to say what they want," replied Ald. Nelson (46th). "We are tired of waiting on them. They have said they want a 'just and reasonable' return, but won't tell us how much that is."

"Is it the plan of the subcommittee to place a fixed contract rate of return in the ordinance?" was the next question.

"That is our plan," replied Frankhauser. "On the present investment in the properties, that is. On new money we haven't decided."

"Will Maj. Kelker submit a rate of return on both old and new money for the ordinance?" he was asked.

### Use Two or Three Methods.

"Yes," the alderman answered. "We want a rate of return upon which to start. He will submit a financial plan on two or three methods."

"What methods did the subcommittee instruct him to use?" was the next query.

"You will have all of his figures when they are completed," Ald. Frankhauser said. "The subcommittee has decided that it will propose any ordinance which provides for an increase in rates."

## \$200,000 STOLEN AS OFFICE BOY STOOPS TO DRINK

New York, Aug. 5.—(Special).—While James Waltz, 16, a runner employed by Arthur E. Frank & Co., stock brokers, bent his head over a drinking fountain in the office this afternoon, a thief disappeared with stocks and bonds valued at \$200,000 which the boy had left on a nearby bench while he drank.

The theft is said to be the largest reported this year in the financial district.

## CHURCH DIVORCE LAW CITED IN COURT SUIT OVER KERENS ESTATE

St. Louis, Mo., Aug. 5.—(AP).—The Roman Catholic attitude against divorce and remarriage after divorce was cited in federal court today as one reason why Vincent Kerens should not receive outright possession of his \$1,500,000 share of the estate of his father, Richard C. Kerens, former ambassador to Austria-Hungary, who died twelve years ago.

The St. Louis Union Trust company last summer filed a suit declaring Vincent Kerens had passed "five consecutive years of sobriety and good behavior," as required under his father's will, and therefore was entitled to outright possession of his share which had been held in trust because of his intemperate habits. He has been receiving \$800 monthly allowance from the estate.

In answers filed today his sisters, Mrs. Madeline Kenna of New York and Mrs. Gladys Colket of Philadelphia, who received their shares without restriction, object to the proposed termination of the trust on the ground that their brother's life had not conformed with the conditions named in the will.

Indissolubility of a valid marriage by divorce is a fixed Catholic belief—a matter of faith not of discipline," the sisters assert. The petition then argues that the manner in which Vincent Kerens obtained a divorce from his first wife, Mrs. Jane Henry Kerens, "violates a fundamental principle and belief of the Catholic faith, and is considered the worst possible conduct of every loyal Catholic, and would be so considered by Richard C. Kerens at the time he executed his will and thereafter."

## PASCHEN ORDERS WORK STOPPED ON CUNEO TOWER

Construction of the Cuneo tower, at Michigan avenue and Randolph street, was halted yesterday by Building Commissioner Paschen. "Should the contractors try to proceed today the police have orders to stop the work and 'keep it stopped,'" Mr. Paschen sent the order to the

police department after consulting Assistant Corporation Counsel Leonard Ettelson, who advised him that such action was mandatory until the zoning board of appeals, which meets on Aug. 13, acts on the three appeals filed by property owners.

Perplexed by Two Opinions. The same opinion had been given to the commissioner in a letter, but he was perplexed, it was understood, by a contrary interpretation of the zoning law received by attorneys for John F. Cuneo, the builder. These attorneys warned him that he would be held liable personally if he halted the building illegally.

The pending action before the zoning board was instituted by the owners of buildings at the southwest corner and the southeast corner of

Lake street and Michigan avenue and by the directors of the Cuneo library, which is directly opposite the site of the proposed tower. The amendment to the zoning law under which the Cuneo permit was issued would permit the tower to soar 60 stories above the street, although the sites owned by the appellants would not be affected similarly.

Protest Against Change. Discovery that the building code had been amended, without the knowledge of members of the committee on buildings and zoning, resulted in a storm of protest from property owners who claimed that the change would lessen the value of property in general.

## PROPOSE USING GRANT PARK FOR FAIR BUILDINGS

The architectural committee of the Chicago 1933 Century of Progress exposition was advised yesterday to draw up preliminary sketches demonstrating how Grant park might be used for temporary World Fair structures. The suggestion was made at a conference of officials of the south park board and the Century of Progress organization when it became apparent that present plans may be too restricted for space.

# A WARNING CALL

to those who want their Silent Automatic Oil Burner

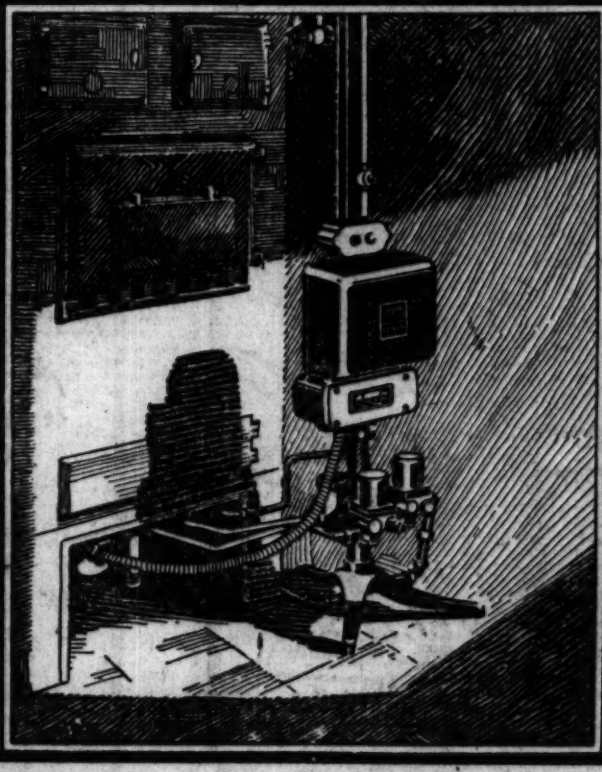

## BEFORE COOL WEATHER

THE Fall rush is starting. Orders are piling up for Silent Automatic Oil Burners to be installed before cool weather starts. We are enlarging our installation force as rapidly as men can be trained. We are making every effort to handle all installations as orders are placed. Right now we are succeeding.

But Silent Automatic sales have more than doubled this year, and we find it necessary to warn those who have been delaying the placing of their orders that there is danger of their being inconvenienced. There is going to be a last-minute rush with the first cool days that probably will put us behind in installations.

We ask your cooperation. For the convenience of both of us we urge that orders be placed now by all persons who want the comfort and convenience of oil heat right from the start of the Fall season. Right now we can handle your installation promptly. We can give time to extra-careful testing and accurate adjustments that add so much to economy and perfect satisfaction.

We have made provision for the financial accommodation of those who may be hesitating for money reasons. Just a small deposit will secure your burner and guarantee its installation before it is actually needed. Don't hesitate... we will arrange

any reasonable terms that will permit you to secure satisfactory delivery.

Again we repeat... PLACE YOUR ORDER NOW. We are going to install twice as many Silent Automatics this year as last, and while we have doubled our facilities we know that at the last minute some will be disappointed in the expected date of delivery. Public demand for this remarkable oil burner makes the peak of the season a time that taxes us to the utmost. But you can make certain that you will not be inconvenienced if you will talk with us at once.

If you are hesitating about making an oil burner selection, let us remind you of our offer to put you in touch with other owners so you may learn what they say about the unparalleled satisfaction that Silent Automatic Oil Burners give. This satisfaction has been responsible for our doubling of business.

Right in your own neighborhood there are persons who are enjoying Silent Automatic Oil Heat. We will furnish their names. You make your investigation yourself, and convince yourself that the unprecedented success of Silent Automatic locally is due entirely to the good things that owners report to their neighbors and friends.

## U. S. THREATENS DEPORTATION TO END TONG WAR

Two Slain in Boston and One in New York.

While Chinese colonies throughout the United States were holding peace meetings yesterday to end the tong warfare, after federal authorities had threatened deportation if more fatalities occurred, the warfare broke out anew in Boston and New York. One Chinese was slain in New York and two were shot to death in Boston, bringing the death toll since the warfare started on Saturday to six.

Both of the men killed in Boston were said to be members of the Hip Sing tong. United States Attorney Charles H. Tuttle of New York summoned the chiefs of the On Leong and Hip Sing tongs, the two warring factions, before him and let it be known that unless the outbreaks ceased, he would move to have them deported. Deportation of 100 Chinese ended in effective fashion the tong war of 1924-25, in which seventy Chinese were murdered.

**Few Able to Prove Status.**  
Mr. Tuttle announced that if there were any further disorders, he would compel the leaders to prove their citizenship. Since most of them, who through birth in this country are citizens, were born in San Francisco, and birth records were destroyed by the San Francisco earthquake and fire, it is virtually impossible for them to prove their status.

Immediately after this warning long distance calls were made to the colonies in Newark, Boston, Chicago, and on the west coast, recommending moves for peace between the two tongs.

**Case of War Mystery.**  
The cause of the new outbreak remained somewhat vague yesterday. One report was that several members of the Hip Sing tong had attempted to leave their organization and join the On Leong. The Hip Sing immediately ordered that these defaulting members be punished.

Another theory was that the war may have arisen as the result of an opium trade conflict. Opium valued at \$50,000 was seized and 47 Chinese arrested in New York's Chinatown Saturday.

### Refuse Reward for Seizing Slayer; Give It to Widow

Sergeants Fred Sacks and John Hanrahan of the detective bureau yesterday refused a \$500 reward given by the Fort Worth, Tex., police for the capture of Tancio Moore, colored, who killed Policeman George Turner of that city, and requested that the money be given to the slain policeman's widow. Sergeant Sacks and Hanrahan captured Moore last Thursday.

St. Joseph, Mich., Aug. 5.—(Special.)—Mrs. W. R. Rodger, 52, killed late last night at Stevensville by an automobile driven by the Rev. G. B. Bessert of Benton Harbor.

## WOMAN AND 7 MEN SEIZED AS RING OF EXTORTIONISTS

Seven men and one woman believed to compose an extortion ring which has been preying on Italians in Cragin and Elmwood Park for several months, were taken to the detective bureau last night as the result of a three weeks' investigation by Detectives Rocco Filletti and William Balamano.

Rocco Maggio, 34 years old, 547 West Taylor street, once condemned to death for murder, was said to be the leader of the gang. He was caught in the apartment of Mrs. Theresa Bruno, 24 years old, at 757 North Carpenter street. The detective notes, which threatened death.

The others captured are Lawrence Corone, Maggio's bodyguard; Michael and Frank Martino; Paul Vitello; Frank Vitello; and Joseph Bruno, father of Theresa.

More than two dozen threatening letters have been received in the last two months, it was said, and most of the victims have "settled" with the extortionists for sums averaging \$500 each.

## These Frigidaire features mean less work for you

The new Cold Control speeds freezing... saves time

If you want an electric refrigerator so efficient, automatic and care-free that you will never have to give it a thought, investigate Frigidaire before you buy.

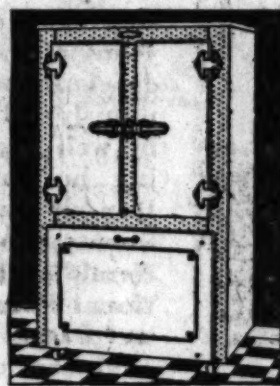

The powerful Frigidaire compressor is concealed in a separate compartment in the base of the cabinet. It is out of sight and out of the way, and yet it is easily accessible. It has the extra power required to meet emergencies. It is built as a fine watch is built. And it is so quiet that you don't hear it start, stop, or run.

These things you can see for yourself. And we urge you to stop in and investigate.

Look for the Cold Control... a simple dial which speeds the freezing of ice cubes and desserts. Look for the patented self-sealing ice trays which increase the speed of freezing. Look for shelves placed at a convenient height to eliminate

stooping. And look for cabinets that are beautiful, well-proportioned.

At the same time you can get the new low prices and the liberal General Motors deferred payment plan.

Model AP-7-2—Ten-Tons porcelain enamel, seamless porcelain enamel lining; 11 cu. ft. shelf space; makes 54 full-sized ice cubes. Equipped with the Cold Control.

Model D-5—Finished in enduring Duco; seamless porcelain enamel lining; 8 cu. ft. shelf space; makes 42 full-sized ice cubes. Equipped with the Cold Control.

### Only Frigidaire will give you all these 8 outstanding features:

1 The Frigidaire Cold Control... which speeds the freezing of ice cubes and makes possible dozens of new desserts.

2 Beautiful cabinets... perfectly proportioned... with all mechanism completely concealed yet easily accessible.

3 Food shelves at a convenient height... no stooping or run.

4 Patented self-sealing ice trays... which retain the intense cold of the freezing unit.

5 Surplus power... which keeps foods fresh and safe... no matter how warm the weather.

6 Quiet operation... you don't hear it start, stop, or run.

7 New low prices... made possible by overwhelming popularity and quantity production.

8 Liberal General Motors terms... enable it to pay for itself while you are paying for it.

## Boric Acid Good But Not Enough

We recommend Iris, America's Eye Bath, because we know it is such a vast improvement over the time-honored eyewash of plain boric acid.

Iris contains camphor, menthol, witch-hazel, boric acid and pure distilled spring water, all sterilized and put into sealed sterile flasks.

Iris does three definite things for you. It makes your eyes sparkle and look alive and vivacious. It cleanses the corners, the base of the eye and the upper and lower eyelids. It relieves soreness and inflammation.

If you will try one bottle of Iris you will realize its virtues. All of our stores are instructed to refund your money if you are not thoroughly pleased. Both the Iris and the Iris Bath come complete with handy eyecup. Try Iris today.

## ASSESSORS FIX TAX EQUALIZING FACTOR AT 37%

Act to Cut Bills Despite  
City Hall Plea.

(Continued from first page.)

It was stated that he had a letter from City Controller Schmidt predicting a financial crisis, but on the advice of the attorneys, he did not read it.

Assessor Ringer moved that the equalization factor be set at 37 per cent. His motion was seconded by Mr. Kruttschnitt.

In explaining his negative vote Assessor Conroy explained that he believed the figure should be even lower. He said that he had made an independent survey of eight downstate counties and found the highest percentage to be 35. The figures of the Illinois Agricultural association, he charged, were made up through the assistance of railroad attorneys and were not to be relied upon.

**Outlines City's Views.**

Following the vote, the chairman called upon Victor S. Peterson, acting deputy city controller and spokesman for Mr. Schmidt, for a statement. Mr. Peterson presented substantially the same information as that contained in the Schmidt letter.

It will be noted that the controller shows in the statement hereto attached a deficit of \$12,546,542 as of Dec. 31, 1929, provided that the total of true city valuations does not exceed \$1,229,000,000 for real estate assessments for the year 1929, and that the board of assessors uses the equalization factor of 37 per cent for arriving at what the assessed valuations will be," the letter stated.

It will be further noted that the controller estimates the 1929 assessed valuations will be on the same basis as that of 1928—for the reason that if there was no justification in assuming that the 1928 valuations would exceed the 1927, and we actually find a big reduction, the most optimistic view is that the 1929 valuations will not exceed those established in 1928.

Reductions in expenditures in 1929, needed to wipe out the contemplated \$12 million dollar deficit, will "probably be made" by preventing the outflowing of the city departments, Mr. Schmidt warned.

If this method should be used, he

said, 84 per cent of the reductions, or \$10,539,000, will be taken from these twelve major activities: Election board, municipal courts, law department, police department, fire department, street lighting, health department, board of local improvements, bridge operation, street cleaning, sewer repair, and parks, playgrounds, and bathing beaches.

The letter emphasized the effect of such a cut upon the police and fire departments.

"Taking the police department," it continued, "we find that 28.34 per cent of this deficit will have to be taken from the appropriations of this department. This amounts to \$3,554,000, or the equivalent of approximately 1,300 patrolmen."

**Lists Other Reductions.**

The fire department, Mr. Schmidt said, will take a cut of 13.54 per cent, or \$1,874,000, while cuts of the other departments will be:

Department	Pct. of cut	Am't. of cut
Health	4.45	\$1,674,000
Board of local improvements	7	930,000
Streets	12.75	1,721,000
Courts	4	500,000
Law	2.00	260,000

"It appears to be too bad that the city, and possibly other taxing bodies, were not apprised of this possibility during the time the state legislature was in session, so that things could have been remedied," he said.

"This office remembers distinctly that when this reassessment work was started the statement was made that it would be completed in approximately six months. It has been a much longer time than that. The city off-

icals at conferences with the committee on finance at various times were advised that the total true valuations of property in Chicago would be anywhere from \$10,000,000,000 to \$15,000,000,000, and the controller therefore is naturally surprised that the total valuations only amount to \$7,329,000,000."

**Suburban Valuations Rise.**

Some discussion was conducted by the announcement by Mr. Cutmore that valuations within the city apparently are to be reduced, while each of the suburbs will receive substantial increases. The market value of all real estate outside of Chicago was placed by Cutmore's appraisers at \$1,917,920,000. The 1927 total assessed value for this territory was \$352,818,485, or only 18.40 per cent of the appraised market value. With 37 per cent as the equalization factor for the entire county, the country town valuations for taxation thus will be boosted 48.72 to 51.05 per cent.

"At a glance, it appears that the tax burden has been shifted to the suburbs," said Mr. Ringer. "That is true, but the suburbs have a solution by cutting their tax rates. For years the rates in Cicero, Oak Park and other suburbs have been high, and the assessed values low. Officials of those communities must bring the rates down to an equitable basis."

The full force of the complaints of the tax spending bodies against the reassessment situation is expected to be felt on Friday at a meeting of their representatives, called by Mr. Malone.

## BURY DEAD IN TRENCHES; GRAVE DIGGERS IDLING

New York, Aug. 5.—(Special.)—Burials on the battlefields of France were recalled today at Calvary cemetery in Queens when more than forty bodies were lowered into long, narrow trenches by strikebreaking cemetery workers.

Since last Tuesday, when 350 Calvary grave diggers went on strike, bodies have been placed in the great Catholic cemetery's vaults. But today found the capacity of the vaults taxed and cemetery officials, at the order of Dr. Shirley W. Wynne, health commissioner, had three trenches dug to receive the bodies for temporary burial.

Dr. Wynne intimated that unless the opposing interests come to agreement within a few days he will force a settlement.

Strikers continued to picket the walls about the cemetery while the families of those awaiting burial complained bitterly over the makeshift interments made necessary.

## 1 American, 2 Mexicans Killed in Tex. Ranch Fight

El Paso, Tex., Aug. 5.—(P)—Mexican Snyder and two Mexicans were killed in a gun fight at D ranch, near Van Horn, Tex., last night, according to word received here today. No details of the fight were received.

## 2 Women, 1 Man Killed in Auto Crash; Hold Driver

Cincinnati, O., (Tuesday)—Aug. 5.—(P)—Three persons, all of Dayton, O., were killed in an automobile accident near Reading late last night. They were: Mrs. Nellie Miller, 37; a man named Redmond, and an unidentified woman. The driver of the car, Patrick Farmer, also of Dayton, was arrested for investigation by order of Coroner Fred C. Spring of Hamilton county. Farmer said the car was sidetracked by another machine traveling in the same direction, which failed to stop. He said he could not remember the woman's name.

**TWO WOMEN KILLED IN CRASH.**

Two women, both of Dayton, O., were killed and an 8-year-old girl seriously injured in a collision between their automobile and a De Soto and Central Iowa interurban car today.

The women, Mrs. Nellie Miller, 37, and an unidentified woman, were killed. The girl, 8 years old, was seriously injured.

The accident occurred at the intersection of the interurban and the highway near Reading, O.

The driver of the interurban, Patrick Farmer, was arrested for investigation by order of Coroner Fred C. Spring of Hamilton county.

Farmer said the car was sidetracked by another machine traveling in the same direction, which failed to stop. He said he could not remember the woman's name.

The accident occurred at the intersection of the interurban and the highway near Reading, O.

## Police Chief Orders Transfer of 88 Men

Commissioner of Police Russell yesterday issued an order, effective at 5 o'clock this morning, transferring eighty-eight policemen. The order was issued to equalize the details at each district station and to transfer men to stations nearer their homes.

## The Meeen for Millions of Sufferers

For over half a century Hot Springs, Ark.—the famous health resort—has been best to hundreds of thousands each year. So great have been the benefits that the United States Government maintains hospitals there. One of the factors in winning fame for Hot Springs has been the Mountain Valley Spring. Over 150,000 patients drink Mountain Valley Mineral Water every year. It is an aid to better health—prescribed by physicians. You can have it delivered to your door. Telephone us for a case.

## ELECTROLUX the SAFE Automatic REFRIGERATOR

**All facts  
...NO ROMANCING**

This is probably the most unusual advertisement  
ever printed about an automatic refrigerator

**1 A Safe Refrigerant.** The  
only refrigerant used in Electro-  
lux is three and a half pints of  
ordinary 30% ammonia.

**2 Hermetically sealed.** No  
chance for leaks. The refriger-  
ant in Electrolux, harmless  
though it is, is permanently  
and hermetically welded in-  
side a solid steel unit for the  
life of the refrigerator. The  
unit has no valves, no moving  
parts or openings of any kind.  
There is no vibration or wear  
—no chance for the refriger-  
ant to escape.

**3 Absolutely noiseless.** Electro-  
lux isn't merely quiet. It  
makes no sound at all. It has  
no moving parts to make sound,  
and so it can't ever become  
noisy after you've had it awhile.

**4 No mechanical parts to wear.**  
There isn't a motor or single  
moving part to Electrolux. The freez-  
ing action is entirely simple. A pilot  
light does all the work—circulates  
the refrigerant that makes the cold.  
There is no friction, no wear, no  
vibration—no possibility of mechan-  
ical trouble of any kind.

Here are the unembellished facts  
about Electrolux, the safe automatic  
refrigerator:

- 1 A safe refrigerant—merely 3½  
pints of ordinary ammonia
- 2 Hermetically sealed against leaks
- 3 Permanently noiseless
- 4 No motor or moving parts
- 5 Costs less to operate... 25 to 55  
cents a week
- 6 Lasts indefinitely
- 7 Tested and approved by national  
authorities

**5 Cost least to operate.** A few pen-  
nies a day, 25 to 55 cents a week,  
that's the entire operating cost of  
Electrolux. This is less than the cost  
of ice or any other system of refrig-  
eration. Far from being an expense,  
a luxury, Electrolux will save you

money every day it's in your  
home.

**6 Lasts indefinitely.** With no  
moving parts, no friction or  
vibration, there is no good  
reason why Electrolux should  
ever wear out. There is no  
more wear to this refrigerator  
than there is to your kitchen  
cabinet.

**7 Approved by national au-  
thorities.** Electrolux has had  
years of careful testing and  
development. It is unani-  
mously endorsed and approved  
by well known national test-  
ing bureaus such as Good  
Housekeeping Institute, De-  
lineator Home Institute, N. Y.  
Herald-Tribune Institute, Na-  
tional Board of Fire Under-  
writers, famous architects,  
engineers and public utilities.  
Those are the facts. One  
thing remains. You must see  
Electrolux—see for yourself its per-  
manent silence, its efficiency, its  
absolute safety and dependability.  
Come in and view the wide range of  
models and sizes in white and color.  
Prices from \$210 to \$510, f.o.b. Evans-  
ville, Ind. Liberal purchase terms.

## SEA FLYERS TELL EXPERIENCES ON FLIGHT TO ROME

Banquet Closes Busy Day  
—Leave Chicago Today.

(Picture on next page.)

After a busy day of entertainment the America-to-Rome flyers, Capt. Lewis Yancey and Roger Q. Williams, told the story of their experiences at a dinner last night given by the Press club at the Palmerhouse.

Other speakers at last night's dinner were George W. Nixon, Lieutenant Commander Nelson of the Great Lakes Naval Training station; Brig. Gen. G. W. Conrad of Fox Sheridan; Judge Harry B. Miller, and others.

Homecoming for Yancey.

For Capt. Yancey the whirl of events since he and his comrades arrived Sunday constituted a homecoming. Yancey is a Chicagoan, and his trip enabled him to visit his mother, Mrs. Margaret Yancey, 4901 Quincy street, and his sister, Mrs. Ruby M. Pearson.

Before attending the banquet the flyers' day began with a flight from the Sky Harbor, west of Glenview, to the Grant Park lake front, accompanied by city officials, aviation leaders, and newspaper photographers.

Parade Through Loop.

Then followed a parade through the loop and a noon luncheon at the Press club, at which Opal Reed, the novelist, made the address of welcome. During the afternoon the flyers paid a visit to the Curtiss air field near Glenview. Williams and Yancey were unable to bring their ship, the Pathfinder, with them, but flew to personal ship of Giuseppe Ballance, who designed the Pathfinder. They are scheduled to leave Chicago this morning and will visit several cities before ending their tour.

Lightning Strikes Plane;  
Eight Passengers Unhurt

Nogales, Ariz., Aug. 5.—(AP)—Eight passengers in a Los Angeles-Mexico City transport airplane today told here of lightning striking the nose of the ship's motor in a storm, en route to Nogales from Los Angeles yesterday, but without injury to any one. The passengers were not aware of the incident until after the ship had landed and the pilots informed them.

Grandson of Arthur,  
Ex-President, Recovers

New York, Aug. 5.—(AP)—Chester Arthur, 28, grandson of Chester A. Arthur, 21st President of the United States, said today he had sufficiently recovered from an attack of inflammatory rheumatism to leave Bellevue hospital soon.

## AVIATION NOTES

(Chicago Tribune Press Service.)

Washington, D. C., Aug. 5.—(Special.)—Official approval has been granted eleven new type airplanes by the commerce department. It was announced today. Four of them are to be powered by the same type engine as used by the St. Louis-Rome flyers in setting a world endurance record.

The new plane types approved were: Commandaire three-place open land biplane, Curtiss 170 horsepower motor; Commandaire three-place open land biplane, Hissac 150 horsepower motor; Swallow two-place open land biplane, Kinner 90 horsepower motor; Stearman five-place cabin land biplane, Pratt and Whitney 525 horsepower motor.

Lincoln two-place open land biplane, 40 horsepower OX-4 motor; Curtiss Fledgling two-place open land biplane, Curtiss 170 horsepower motor; Curtiss Fledgling, Jr., two-place open land biplane, Curtiss 170 horsepower motor; Boeing five-place cabin land biplane, Pratt and Whitney 525 horsepower motor.

Travelair three-place open land biplane, Wright 165 horsepower motor.

Travelair three-place open land biplane, Curtiss 170 horsepower motor; Alexander three-place open land biplane, Kinner 90 horsepower motor. Planes manufactured in accord with these types are eligible for commercial licensing. This brings the total of approved types to 190.

Frank Hawkes, transcontinental non stop record holder, visited the municipal airport yesterday before proceeding to New York City on a non-stop flight. His plane, the Lockheed Air Express, has traveled 3,000 miles on the present pathfinding tour. He came to Chicago from Milwaukee.

Flying three Curtiss Hawks, army pilots H. A. Johnson, M. B. Harding and F. Garrison stopped in Chicago yesterday en route to an American Legion convention at Winona, Minn., where they will dedicate a new airport. The three flyers are stationed at Selfridge field, Mount Clemens, Mich.

Cable dispatches say that the Duchess of Bedford, England's flying peeress, reached Karachi, India, yesterday from Lymphe, England, on an air journey of 10,000 miles from England to India and back within a week. The duchess started on her return flight home last night.

Under the official observation of the National Aeronautical association, Tex Rankin will attempt a non stop flight from Vancouver, B. C., to Aguascalientes, Mexico, on Aug. 11. The 1,350 mile trip will probably take 12 hours. The ship to be used will be a Great Lakes 2T-1 biplane, with a 90 h. p. American Cirrus engine.

According to figures of the Aeronautical chamber of commerce, 259 bills relative to aviation have been introduced in state legislatures during the last twelve months. One hundred and six of them were enacted and 43 defeated.

The German all metal Messerschmitt plane will soon be manufactured in the United States, according to the announcement of the Bavarian Aircraft corporation, of Germantown, Pa. Engineers from the German plant will be sent to this country.

## Lamp Bases and Shades

Assemble Your Own Lamp  
At Substantial Savings

During This Semi-Annual Sale Event

A FORTUNATE purchase enables us to include in the Semi-Annual Sale, at very special prices, a large group of lamp bases and lamp shades, new in design—of a type that will be conspicuous in well-planned decorative schemes of the coming season.

Much Below Usual  
In Price  
Lamp Shades

In Parchment Effect  
**\$1.50 to \$6.50**

No two shades alike in the entire group! An assurance of individuality, that, whatever sort you choose! But it makes an early selection almost a necessity—if you wish a complete range of types in choosing.

Shades for every kind of lamp in every kind of room! Some are hand-painted, others have those attractive appliqued designs. Some are modernistic in feeling, others owe their charm to quaint old prints. All of them qualify for an important place in the room scheme—all are priced for substantial savings. Priced according to kind from \$1.50 to \$6.50.

Seventh Floor, South, State.

Lamp Bases  
In Old English Bronze  
Finish  
**\$7.50 to \$20**

Appropriate selections for every room in the house may be made from the wide assortment in the group, for it includes table lamps, bridge lamps, junior lamps—in all manner of attractive styles.

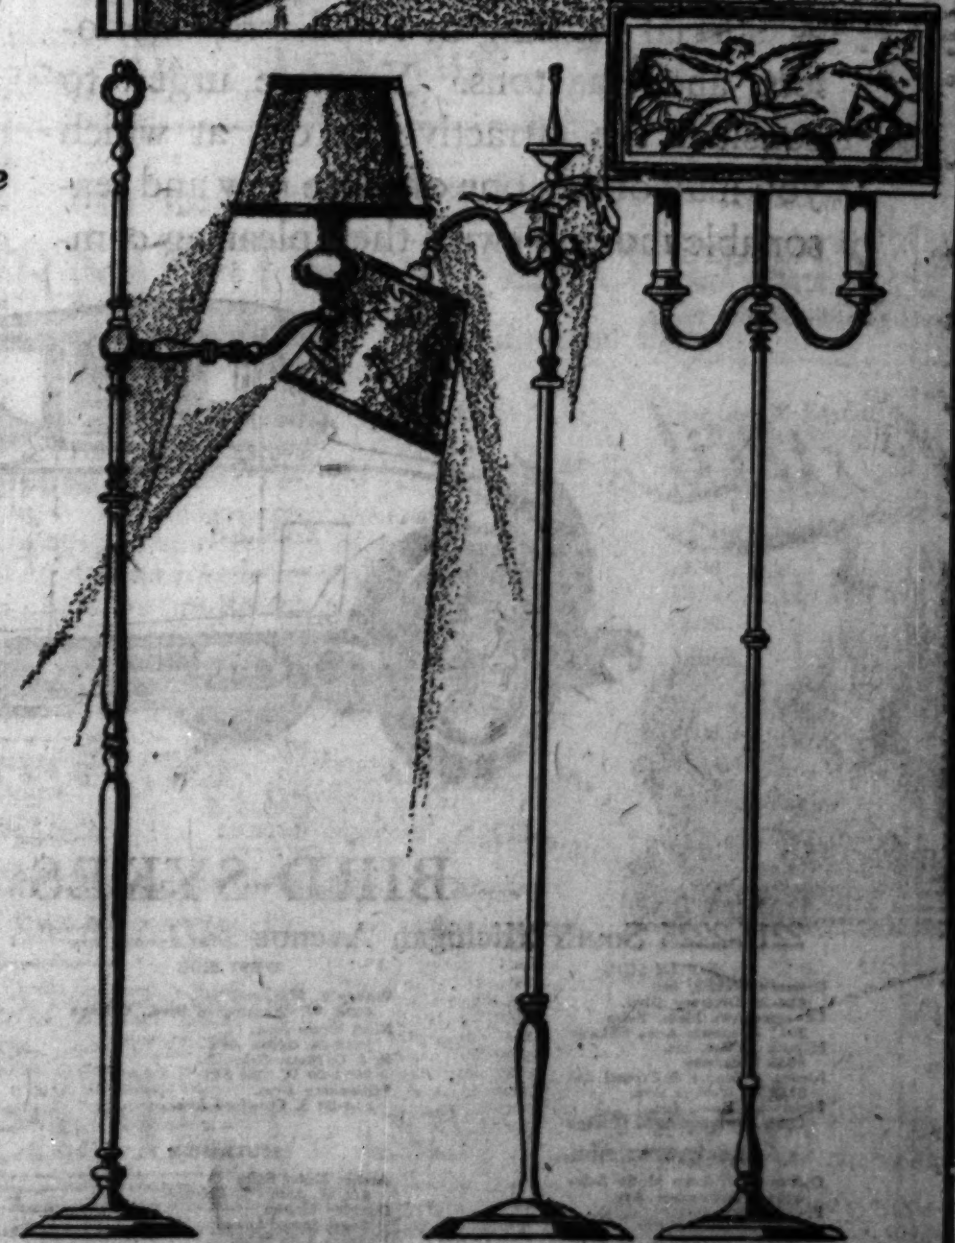

All have the smart Old English bronze or pewter finish that are so well-liked in fashion-wise modern homes.

The styles are simple, yet distinctive, designed to fit adaptably wherever placed. Prices range from \$7.50 to \$20, all very special values.

Seventh Floor, South, State.

The Semi-Annual  
Sales Include

## SNOOK'S STORY OF KILLING CO-ED IS GIVEN TO JURY

Told by Reporters on the  
Witness Stand.

Columbus, O., Aug. 5.—(AP)—Dr. James H. Snook's admission that he killed Theora K. Hix, his co-ed mistress, and left her battered body on a rifle range here on the night of June 13 was introduced in evidence today in his trial for murder.

Two newspaper men, William C. Howells of Cleveland and James E. Fusco of Columbus, related in detail an interview they had with Dr. Snook a week after his arrest, in which the former Ohio State veterinary professor described the girl's death.

In order to avoid a contest with the defense attorneys, Prosecutor John J. Chester Jr. used the two newspaper men to support his case before the jury, rather than introduce a signed statement obtained from Dr. Snook after 23 hours of questioning.

Repeat His Story of Killing.  
Howells and Fusco testified Dr. Snook said he beat the girl with a hammer when she made a threat against his life and that he slashed her throat with his pocket knife because she was "unconscious and moaning."

The defense probably will make use of the testimony later to prove its claim that the former professor killed the girl in self-defense.

In substance Dr. Snook's story, according to Howells, was as follows: "I met Theora on North High street about 3 o'clock on the night of June 13. She was quarreling with me, so I decided to drive with her to

## SLUMP IN BUILDING SHOWN BY PERMITS ISSUED DURING JULY

Building activities in Chicago slumped during the last month compared with both June of this year and with July, 1928, according to the monthly building report made public yesterday by Building Commissioner Paaschen. The number of permits issued last month was 78 less than that of June, and were it not for the fact that the permit for the Cuneo tower had been issued the cost of the buildings would have been approximately \$2,200,000 lower than of the preceding month. The cost of the new structures last month was \$14,000,000, compared with \$23,000,000 in July of last year.

The comparative report is as follows:

	July, 1929	June, 1929	July, 1928
Residential	534	593	543
Commercial	96	145	286
Industrial	100	146	181
Miscellaneous	55	59	68
<b>Total</b>	<b>785</b>	<b>943</b>	<b>1078</b>

In the first seven months of this year permits were issued for the erection of 1,909 apartment buildings containing 12,692 flats. During the week ending Aug. 1 permits for 103 buildings to cost \$3,426,000 were issued.

the rifle range to show her the shooting grounds. The quarrel continued. Suddenly she grabbed her purse, in which she sometimes carried a revolver that I had given her. I thought she meant to shoot me. I reached for the hammer in my car and struck her once with the flat side of it.

"She made no outcry, but she kept cursing me and saying, 'I'll kill you. I'll kill your wife and baby.' She started to get out of the automobile. I followed her. I kept hitting her with the flat end of the hammer, but once I used the round end.

"Her purse fell to the ground and her keyring dropped out of it. She struggled to get back to the car but I slammed the door. When she fell she was lying on her side. She kept moving a little. I hated to hit her

any more, for she was moaning and she had my sympathy.

"As she was lying on her back I cut her throat with my penknife. Still she kept moving a little, but she became quiet and was motionless when I left the rifle range.

Why? He Doesn't Know.

"I can't tell you why I cut her throat. I can't explain why her body was lying face downward when it was found, for she was on her back when I slashed her with the knife. She could not have turned over.

"The last words I heard her say were: 'I'll kill you, too.' I thought she meant this for she sometimes carried a pistol and knew how to shoot.

"When she said she would kill my child, I resented that, it was too much. Our affair was not a love affair, but just a pleasant, temporary arrangement. I still loved my wife."

Prosecutor Chester announced at ad-

judgment the state would rest its case tomorrow morning. He had one more witness, whose name he would not divulge.

Tells of Excitant Use.

C. F. Long, Columbus city chemist, took the stand again today at the morning session. He told asked Long

if he had found any antennae in Miss Hix's stomach from an insect used in preparing the excitant the state alleged Dr. Snook gave her.

Long replied positively that he had found such antennae. He added that he had also isolated with a microscope the wings, body and legs of the insect.

## ITS AGE IS A PRIVATE MATTER

It is very difficult to discover, by its appearance, how old a Lincoln is. Lincoln believes in making automobiles so beautiful that they are always modern—so durable that they simply won't wear out. The age of a Lincoln is no one's concern—least of all its owner's. On the boulevards a Lincoln of last season and the newest model share honors equally with Lincolns years older than either.

So fine is this car that a year or so of use does not perceptibly detract from any of its splendid qualities. Lincoln owners are often men who can, and do, provide the best professional care for their cars. Sometimes such well-kept cars are available at very attractive prices from Lincoln dealers. The wisdom of investing in such a motor car is quite evident, and shrewd buyers are quick to take advantage of the opportunity.

A few such Lincolns are now to be seen on the floors of the authorized Lincoln dealers listed below. These companies are the only Lincoln dealers in the city of Chicago and suburbs authorized by the Lincoln Division of the Ford Motor Company to sell and service Lincoln automobiles. If you are considering the purchase of a used Lincoln, your own best interest demands that you deal only with one of these four authorized Lincoln dealers.

## FIVE SOUGHT FOR \$10,000 ROBBERY IN MIDWAY HOTEL

Gunmen Seize Pay Roll and Loot Office Safe.

(Picture on back page.)

Police last night were endeavoring to trace five well dressed young gunmen who escaped in a sedan early in the day with \$10,000 in cash and securities taken in a holdup of the Hotel del Prado, Blackstone avenue and the Midway.

So quietly did the bandits work that a woman telephoning from a booth a few feet away was not aware that the robbery was taking place.

One of the robbers entered alone to meet the situation. Pay roll funds amounting to \$4,000 had been delivered to the hotel a few minutes before and police believe the robbers trailed the hotel's automobile from a neighborhood bank.

Stalking over to the cigar case, the scout bandit ordered a couple of cigars of Miss Lotta Friedel, then, without picking up the cigars, he walked briskly to the door and gave a signal. Immediately the scout, who also appeared to act as leader, was joined by two other gunmen. These two drove before them Carl Herman, a student who had been seated upon

IN THREE MOMENTS A LABORER WILL REMOVE AN OBSTRUCTING ROCK BUT THREE MOONS WILL PASS WITHOUT TWO MEN AGREEING ON THE MEANING OF A VOWEL.

the veranda. The other two bandits brought up the rear.

John King, the clerk, was forced to hand over \$850 in cash. Then the robbers moved on into an inner office where Miss Fern Hunt, an assistant manager, and Miss Mary Locke, telephone operator, were sitting.

"Stick 'em up and face the wall," the robbers ordered. The \$4,000 pay roll was taken and in addition the robbers got nearly \$1,000 in cash and \$5,000 in securities belonging to Miss Hunt from the office safe.

On their way out they met Mrs. Robert Black, wife of a heart specialist, and her 15 year old daughter. The girl screamed, but the robbers ignored her and ran to their auto and drove away.

## CARLETON COON, LEADER OF BAND, KIDNAPED, ROBBED

(Picture on back page.)

Carleton E. Coon, co-director of the Coon-Sanders orchestra, was returning from the Delta, a roadhouse where his band is playing, to his home at 714 Foster street, Evanston, early yesterday, when four masked highwaymen waylaid his car in Niles Cen-

ter, forced him into their machine, and drove to Lunt and Western avenues, where they took from him a \$4,000 ring and \$400 cash.

Instructed to look for his own car a few minutes later at a corner two blocks away, Coon obeyed and found it. The robbers advised Coon to describe his adventure over the radio and assured him that they would listen in.

## Postoffice Receipts Gain 12 Per. Cent in July

Postmaster Lueder announced yesterday that figures submitted to him by Auditor Charles C. Lohman show the receipts of the Chicago postoffice for July, 1929, were \$4,508,829.34, an increase of 12 per cent or \$413,555.54, over the receipts for July, 1928.

## The Mark of Genuine Aspirin..

BAYER ASPIRIN is like an old friend, tried and true. There can never be a satisfactory substitute for either one. Bayer Aspirin is genuine. It is the accepted antidote for pain. Its relief may always be relied on, whether used for the occasional headache, to head-off a cold, or for the more serious aches and pains from neuritis, arthritis, rheumatism or other ailments. It's easy to identify Bayer Aspirin by the Bayer Cross on every tablet, by the name Bayer on the box and the word "genuine" always printed in red.

Aspirin is the trade mark of Bayer Manufacturers of Monoacetic Acid Derivatives

## G. O. P. LEADERS WATCH VIRGINIA PRIMARY TODAY

Democrats to Nominate  
for Governor.

BY ARTHUR CRAWFORD.

(Chicago Tribune Staff Service)  
Washington, D. C., Aug. 5.—(Special.)—Politicians of both parties are keenly interested in tomorrow's gubernatorial primary in Virginia, which is a certain raucous for an election battle of national importance in November. The election in November is expected to demonstrate whether the Republicans have any chance of again

breaking into the solid south in the presidential election of 1932. Only the Democrats are involved in tomorrow's primary. Three candidates have engaged in an active contest over the nomination for governor to succeed Gov. Harry L. Byrd, who is not seeking reelection. The winner of the primary contest will be pitted against Prof. William Mosely Brown, who was first nominated by the anti-Smith Democrats led by Bishop James Cannon Jr. and then endorsed by the Republican state convention.

Would Repudiate Raskob.  
The avowed purpose of the Cannonites is to smash any Democratic nominee who has failed to repudiate Alfred E. Smith and John J. Raskob as leaders of their party. This anti-Smith Democratic group actively supported Herbert Hoover and were an influential factor in carrying the state of Virginia for the Republicans.

Virginia was one of six southern states which slipped into the Republican column last November, the others being North Carolina, Florida, Oklahoma, Texas, and Tennessee. The anti-Smith Democrats, using prohibition and religion as issues, contributed to each of these Republican victories. What the politicians of both parties

are now intensely interested in is whether the Republicans have actually gained a foothold in the south or whether the 1928 result was due solely to the abnormal conditions caused by the liquor and religious issues. If the Democratic gubernatorial candidate wins in Virginia in November it will be interpreted in all probability as meaning that the southern states may be expected to be back in line in 1932.

The three candidates for the Democratic nomination for governor of Virginia are John Garland Pollard, G. Walter Mapp, and Rosewell Page. The general impression is that Mr. Pollard, who is a lawyer and a professor at William and Mary college, and formerly was a member of the federal trade commission during the Wilson administration, will win.

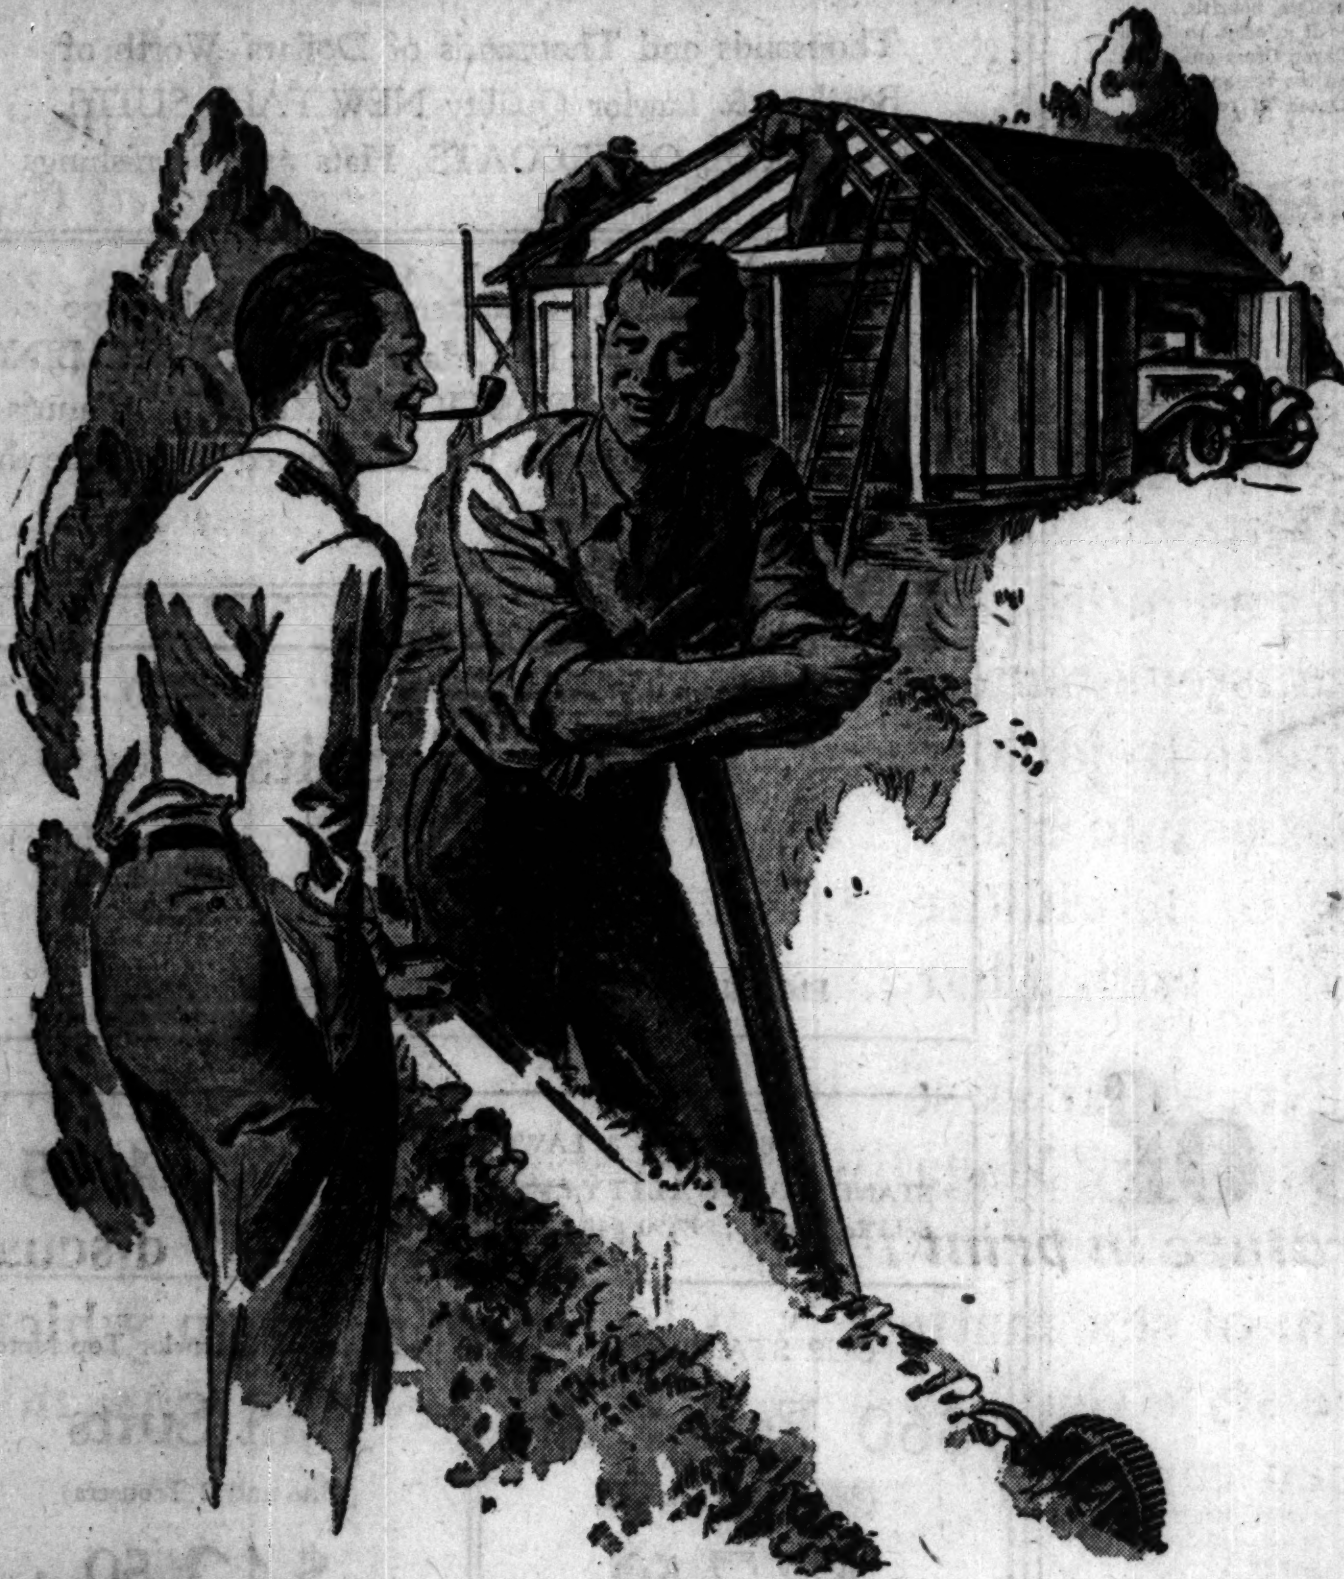

The political fortunes of Senators Carter Glass and C. A. Swanson are somewhat at stake in the election contest. Both will support the nominee of the Democratic primary. Senator Glass comes up for reelection next year. If Bishop Cannon, who is at odds with Senators Glass and Swanson and Gov. Byrd, can elect a governor, he proposes to go after the scalp of Senator Glass.

## HUSTON, OF SOLID SOUTH, LIKELY G. O. P. CHAIRMAN

(Picture on back page.)

Washington, D. C., Aug. 5.—(Special.)—Election of Claudius H. Huston of Chattanooga, Tenn., to the chairmanship of the Republican national committee at the meeting of that body called for 8 p. m. is regarded by most party leaders here as virtually certain. The call was issued today in Denver, Colo., by Dr. Hubert Work, the retiring chairman. The committee will assemble at the New Willard hotel in Washington at 10 a. m. that day. A vice chairman and members from states where vacancies have occurred also will be filled.

The committee naturally will defer to the wishes of President Hoover as the titular leader of the party, in regard to electing the chairman. Latest word from the White House is that several others are under consideration, including Ralph Williams of Oregon, vice chairman of the committee, and George Woodruff of Chicago. The chief executive and Mr. Huston long have been personal friends.

"This year I'm keeping our old car, as a second car, instead of trading it in."

MY family is large enough to need two cars. This year I'm going to keep my old car instead of trading it in on the new one. Of course, trading it in would make a difference in the cost of the new one. But that's outweighed many times by the convenience a second car will mean to us—and our old car is good for years more.

"I am enlarging my garage to make room for two cars. But that's a good investment in itself because it will increase the value of my property and make it easier to sell."

### A used car is unused transportation

General Motors suggests that you keep your old car when you buy a new one. More and more families are doing it each year. That is a reason why the number of two-car families has jumped from 300,000 to over 3,000,000 in ten years. Used cars have years of unused transportation in them; years of satisfactory performance. And the GMAC low-cost plan of purchase makes it easy to pay comfortably for the new car while you enjoy its use.

# To One Cupful of True Emotion, Add—

*To one cupful of true emotion just add one or more unexpected incidents as the emotion boils up, then stir well with the condition of the times, and you have the average True Story of the average life.*

Of course, only the very great writers and thinkers, on the one hand, and the great mass of people who are not writers at all, on the other, understand this. Popular writers of popular novels do not understand it in the least. But the truly great and the truly simple understand that life is made up of *apparently unimportant, stupid incidents coming at the wrong—or the right—time and utterly changing the courses of our entire lives.*

Clarence Darrow, for example, tells us that as a young man, when he was first admitted to the bar, he had selected a small Ohio town to settle down in for the rest of his life. He had become engaged to a girl and had gone out and bought a house. The next day when he went around to make the first payment on the house the real estate man refused to take it and raised the price. The young Darrow thereupon gave up the house, packed his valise, and set off for Chicago.

Darrow, at seventy, still student of philosophy, of literature, of life, *understands the tremendous importance of unimportant incidents at such important times.* And he tells the story in just that way.

If John Galsworthy were writing the life of Darrow, he would probably tell the story in the same way. But to a writer of average ability, the first payment on a house as the determining factor in a great life, would not have much savor. A first payment on the girl, or some similar climactic event would make a better start.

Strangely enough, the true stories in True Story Magazine, written by a great mass of people who are not writers at all, lean more to the Galsworthy style of writing a story and the Darrow style of thinking it out. They also seem to realize somehow that life is made up of these comparatively unimportant and oftentimes trivial incidents which cannot be anticipated and over which no one seems to have control, *but whose outcome in emotional crises changes the whole current of their lives.*

That is why we so often find in these True Stories a type of narrative wherein the *emotion* and not the *incident* holds sway. And that is also why the emotional trend of these True Stories is so often misunderstood. *To call them sex stories is utterly absurd.*

To begin with, the great mass of people do not deal with a discussion of sex as lightly as it is dealt with, for example, by our popular literature of the day, or by any gathering of the socially elect, or even in the little chit-chat, let us say, of a group of debutantes.

*You may not know it, but sex is still rather sacred with the mass.* A "teameo" (which is a teamster's name for a teamster) may be a very profane individual. He may even call his wife names that would make a butler shudder. But if he heard any of his children talking sex, he would *slap them down* with a hard and horny hand.

No; so far as sex is concerned, the true stories of True Story Magazine are probably *the cleanest literature in print today.* The free and easy discussion of sex matters is at least one point in which the style that has been set by the ultra class has not been carried down.

*But so far as life itself is concerned, these stories which were once rather drab and sordid are now becoming very interesting.*

And the reason for that, of course, is the stirring in of the condition of the times which we gave you in the original recipe at the top of this page.

That young Darrow coming to Chicago today would have rather a hard time of it finding any labor cause to espouse. He couldn't fight again for shorter hours, for higher wages, or child-labor laws, or laborers' compensation acts—all of which formed the very crux of that man's early life.

*Today, if he were to espouse the cause of labor, it would probably have to be as their financial advisor, telling them what to do with their money.*

And that is why, to any one who is student-minded, the true stories of today in True Story Magazine become decidedly interesting reading matter, with plenty of food for thought in the new economic settings which they portray.

A DISCREDITED MORAL  
LEADERSHIP.  
Bishop James Cannon Jr., chairman of the board  
of temperance and social service of the Methodist  
Church South, has published an extensive reply  
to his critics who have condemned his speculations  
in Wall street, in war time four, and his handling  
of funds in the presidential election. He denies  
that what was called a "clear case of four board-  
ing" by the chief of the food administration en-  
forcement division was more than a precaution to  
provide what the Blackstone Female Institute  
would need. His explanation of the political funds  
was not contained in the excerpts sent from Wash-  
ington.

He said of his Wall street operations with a new  
defunct bank that he was buying on the  
installment plan. A more worldly view of the fact  
would indicate that he was carried by the firm on  
very small margins and as a bishop was recog-  
nized by his brokers as having a moral value.  
The bishop said he had been brought up with the  
small town idea that trading in Wall street stocks  
was gambling, but that he had taken a more prac-  
tical view.

He was prepared to differentiate, he said, be-  
tween crap shooting and lotteries, in which it was  
all chance and no skill, and card playing, horse  
racing and stock adventures, in which both skill  
and chance were involved. It is to be gathered  
that the bishop has become a libertarian in his  
church, as he says that he believes "the time has  
come to brush aside much muddled thinking on  
this subject."

Some of this opinion may be inquired into by  
the disciplinary authorities of the church, and in  
a edition who did not seek to make some of his  
moral views the law of the land and the rule of  
government his views could be dismissed as mat-  
ters for his personal decision. But Bishop Can-  
non is a coercive moralist. He has appeared in  
public action and discussion as a man of uncon-  
promising demands upon the habits of other peo-  
ple. He is not a libertarian. He endeavors to as-  
sume political control of other people on the as-  
sumption that his method of life must be followed.  
In such a character there is no room for compro-  
mise which benefits him. His claim for moral  
leadership goes to pieces.

It is almost uniformly the case that when facts  
are revealed concerning a person conspicuous in  
the moral dragooning of others they are not cred-  
itable to the person explained by them. The moral  
guardianship maintained at Washington and else-  
where with available funds and by a species of  
political blackmailing is exposed from time to time  
as religious racketeering. The lobby ask for respect  
on the ground that they are of superior morality  
themselves. Their leaders are found in compro-  
mise, sometimes unscrupulous and sometimes il-  
legal practices. This leadership is coercive but  
not exemplary. Its pretensions are confounded by  
its acts.

BY SEA AND AIR.  
The voyage of the Graf Zeppelin from Fried-  
richshafen to Lakehurst took 36 hours and 23  
minutes. The actual crossing of the Atlantic was  
about 23 hours. The new German liner Bremen  
crossed on a shorter course in the same direction  
in 115 hours 45 minutes. It made the return  
in 119 hours 36 minutes. The advantage of time  
of the air route over the steamship voyage,  
though considerable, is therefore not great enough  
to offset in the minds of most travelers the  
greater risks and uncertainties of the new adven-  
ture, to say nothing of the resources of entertain-  
ment and luxury which have been given so much  
attention in the development of the North Atlan-  
tic liners.

But even the margin of gain in time as between  
these two trips cannot be taken as a reliable basis  
for comparison between regular methods of trans-  
port. It is true the Graf Zeppelin encountered  
head winds and backed a gale which slowed it  
down somewhat. But these are permanent factors  
in travel by sea or air, and the Zeppelin will have  
to demonstrate its practicality, its stanchness,  
and speed under the worst conditions before it  
can be accepted as a normal transport or compete  
seriously with ships. When it can drive into an  
Atlantic winter storm, or escape of hurricane force  
with as much confidence and safety as the Bremen,  
the Mauretania, or any modern liner, large or  
small, it will be established. Until it can do so  
travel will go with the latter. The weather over  
the North Atlantic is perhaps the worst of any  
main thoroughfare on the seas. It is not enough  
for an airship to make the jump in quiet mo-  
ments. A ship of the air, like a ship of the sea,  
must prove ability to conquer weather at its  
worst. Travel by Zeppelin is a daring experiment  
which has not reached its Q. E. D.  
The record smashing voyage of the Bremen is  
an event which should not be overshadowed by  
the Graf Zeppelin's spectacular performance. It

may very well prove to be more important in its  
consequences. Had the Bremen beat the Maure-  
tania an hour or two the victory, though highly  
creditable to German nautical and engineering  
science, would not have been epoch making. We  
think the Bremen's performance is. The main in-  
terest is so great that it puts the Bremen in a  
class by itself and will force radical improvements  
in the design and equipment of all competitors.  
There has been no such gain since the victory  
of the steam driven liner over the sailing packet.  
It is not without significance that both the  
Bremen and the Graf Zeppelin are German.

### EXTENDING THE WEST SIDE HIGHWAY.

President Chrysler of Oak Park has conceived  
the splendid idea of extending the proposed west  
side superhighway through the western suburbs  
to the Des Plaines river. Mr. Chrysler will appoint  
a committee to promote this plan.

Oak Park will be a principal beneficiary of the  
elevated highway, for the construction of which  
a bond issue referendum has been authorized. Mr.  
Chrysler appreciates that in order to participate  
completely in the benefits of the uninterrupted  
highway Oak Park and the other western suburbs  
must contribute to its natural completion. The  
natural boundary of Chicago is not the Oak Park  
line and the value of an east-west thoroughfare  
does not cease at this artificial boundary. Traffic  
in east Oak Park is no less congested than in  
Austin, and since it is desirable to traverse Austin  
by a superhighway it is also desirable to improve  
motor communication through east Oak Park and  
the suburbs beyond.

Mr. Chrysler suggests that the highway be pro-  
jected at least as far as the Des Plaines river.  
There is no natural reason for terminating it  
there. Geneva is a suitable terminal for a high-  
way which is designed to furnish access to the  
west side and the western suburbs, for Geneva is  
well within the congested metropolitan area. Un-  
doubtedly by the time the highway is completed  
to Geneva there will be a demand for a still  
longer extension. Mr. Chrysler will receive the  
gratitude and he should receive the support of  
his constituents for his resourceful and progres-  
sive conception of the traffic problem.

### CIVIC AND HOW.

The civic dog racing and betting at Arlington  
under the management and patronage of some of  
the very best people appears to have done very  
well in a money way, the accounting showing a  
profit of \$500,000 for the season. The officials of  
the American National Jockey club learn the dou-  
ble pleasure of being civic and solvent, a pyram-  
iding combination, and it is planned for next sea-  
son to put up the richest turf stakes and purses  
in the world, thus adding to the good name of  
Chicago.

The civic dog racing seems not to have made so  
successful a go of it, owing to legal troubles, and  
nothing can be guaranteed as to this enterprise  
which may be an outcome to be endured without  
regret. Mr. Wrigley's Civic Players are going  
strong with a lead which will permit a slip or  
two but not too many of them. They promise also  
to be solvent as well as civic. They now talk to  
the road, and it may, of course, be down hill, but  
they do not need to borrow money and the rest  
of the city does not need to borrow trouble.

In the main the civic thing in this city is so-  
complicating the results instead, getting the  
brightest and the best culture for Chicago. To  
this endeavor is being added a civic boxing com-  
mission whose new motto will be the best in prize  
fights with a minimum of holding.

### COUNTERFEITING MEDICAL LICENSES.

W. H. H. Miller has been indicted on the charge  
of counterfeiting and selling Illinois medical  
licenses. This is the same Miller who was found  
guilty and fined for irregularities in examinations  
and the issuance of licenses while he was director  
of the state department of registration and educa-  
tion. Before his first trial Miller's conduct had  
become so notorious that former Gov. Small, tol-  
erant as he was, dismissed him.

The purpose of the registration bureau is to  
protect the public against incompetents and  
quacks. Instead the department has been used  
to protect and promote the fortune of quacks and  
incompetents. Butchers and bachelors operate with  
official sanction. This consequence, of course, was  
not foreseen by those who originally sponsored  
the creation of the department. To them the  
social evils of corrupt and ignorant medical prac-  
tice suggested a political cure. But the political  
cure apparently has only aggravated the evil and  
produced more latitude for exploitation by official-  
dom. Whether a department of registration should  
be worse than no such department we are not  
prepared to say. Probably it would not be wise  
to abandon the system if the state is disposed to  
reform it. Even, however, if the new revelations  
of degradation do not contribute to the abandon-  
ment of any existing political functions, some  
advocates of government therapeutics may be  
critical enough to observe that the experience of  
the state department of registration is typical.

The lesson to be learned from the Miller episode  
is that political influence over private undertak-  
ings should not be extended, but should be mod-  
ified and curtailed. Miller was probably more  
genuinely unqualified and unscrupulous than the  
average political overseer, but the average is not  
high, and when the impulses arise to improve  
social conditions by recourse to state control it  
is well to remember that the principle will be  
nullified under the charge of the average politician.

### Editorial of the Day

(ADV.)  
[St. Louis Post-Dispatch.]  
We are indebted to the jolly old Manchester  
Guardian for the following specimen of the American  
language, reprinted from the Manchester Journal,  
which, in turn, found it in an American publication  
(probably Billboard):

At liberty, abundant; hot and sweet, plenty  
pep, read and take, can sing, play in tune, gold  
outfit, tuxedo, double at drama, dirt and flash,  
hot sock symbol, ham lay off, young and gold  
looking; some victim when needed; double set  
and goofs.

Although some of these terms strike us, we have no  
doubt that any jazz orchestra leader would find this  
advertisement most satisfyingly descriptive. It is to  
the point, highly colorful and, even though such  
phrases as "play in tune" would make the late Her-  
von Beethoven turn uneasily in his grave, expresses  
perfectly the spirit of jazz.

THE POTENTIAL ARTIST.  
"So your son is going to be an artist? What are  
you doing to help him?"  
"Sandy—I'm letting his hair grow, the rest is up to  
him.—Pathfinder.

### A LINE O' TYPE OR TWO

How to the Line, let the  
quips fall where they may.

### OLD STORY.

She performed her body and basted her hair—  
Once held in her arms for a few hours the mare  
Of a dream spun in shadow and candle light,  
Spun of no substance beyond the night;  
Followed her life as most people do—  
Shedding perfection to sensible brow.  
Dressed in faded—bodies of fear—  
Eyes that learned wisdom through many a tear—  
Lives in fair portion—happiness won,  
Clear-eyed and proud, in the face of the sun . . .  
Long, fruitful, solid years. Strange it would seem  
Along their beauty was dimmed by the dream.  
JUDY SHER.

### Just for That George Ought to Pack Up and Come Right Home.

Not that we're going to tell you what those  
things are that George Washington is carelessly  
leaving against in the replica of the Houdon  
statue in front of the Art Institute, but we'll tell  
you what the author of "More Queer Things About  
London" says. Says Londoners think they are.  
"This very rude author says: 'George Washington,  
looking very much 'left left called for,' is dumped  
down on the little lawn in front of the National  
Gallery. . . . To English eyes Washington ap-  
pears to be a very odd fellow. He is an arm on a  
key-peg's brush and bundle of rods. It is thus  
the most irretrievably laughable statue in London."  
We think the author of "More Queer Things About  
London" knows as much about art as a camel does  
about the effects of the moon on the tide. How-  
ever, we still wonder how many of those who  
admire Houdon's statue know any more about what  
those things are that George is leaning against  
than the Londoners who scoff at the statue.

### Speak Louder, Lady!

What Did You Ask For?  
In spite of the fact that the Graf Zeppelin came  
right down on top of us Sunday night when we  
were holding our monthly services and squashed  
fifteen minutes of our time just as fast as a pan-  
cake, nevertheless, we are thinking of our next  
Air Line Night, the first day of September. We  
have decided to make this an Anniversary Night,  
because just one year ago, come September 1st,  
we gave our first radio show. In commemoration of  
this solemn event we'll make Anniversary Night a  
request program. Anything you especially liked  
in the Air Line Night programs, tell us, and we'll  
repeat it September 1st if our time limit permits.

### Always Belittlin'.

How can Americans and Englishmen ever agree?  
If you ask us, it's a hopeless case. Take, for ex-  
ample, F. Y. T. Gries, an Englishman, who has  
just published a nice little book called *Breaking  
America's Hind*, in which he goes all around Robin  
Hood's barn to say fine things about American  
slang. "The slang coined from year to year in  
England is, most of it, dumpy, feeble stuff when  
compared with the output of America," says Mr.  
Gries, among other things. "It is to America that  
we must chiefly look in future for the replenish-  
ment and refreshing of our language." Now, you  
would think that every man jack of the untidy-  
million Americans would stand up and if not salute  
the Union Jack, at least agree that their English-  
man certainly enunciated a mouthful. Not so. At  
most before *Breaking America's Hind* is off the  
presses the New York World has taken up the  
cudgels. What about "Giddio"? It asks truce-  
lessly; what about "The that bull outside"? "Be-  
st!" "Tid it to Sweeney!" "Believe me!" "Tid  
the cock-eyed world!" "Good night!" "Wouldn't  
it say you?" "I hope to tell you!" What about  
a thousand-a-million-other examples of slang  
that have been considered smart during the last  
twenty-five years and are now with the mowms of  
yesteryear? "All these expressions," the World  
continues crushingly, "suffer from a high mortality  
rate, and the reason is obvious. They are no good.  
Too much, it seems to us, is said in favor of slang,  
particularly American slang." It all proves, if  
it proves anything, that Americans and English-  
men can't get on, no matter what they say. Maybe  
our forefathers were right when they agreed, for  
whatever reason, to disagree.

### Lagniappe.

NICE, COOL, PLEASANT weather in the great  
crowded cities these days. There's no reason for  
mouthing this fact this morning except to spoil  
the day for the vacationists now in the woods and  
at the lake resorts.

BISHOP CANNON JR., to whom we have fre-  
quently and with great familiarity referred as the  
Big Gun of the Dry Crusaders, replies to the  
charges that he was a food hoarder during the war,  
and later on a Wall street gambler, in a brochure  
of 20,000 words. Now, why? Because those who  
are ungrateful to the good bishop wouldn't be  
convinced if he used twenty million words in his  
reply, and those who are for the bishop would be  
sure he was right if he answered with only the  
number of words he could get on the back of a  
postage stamp.

GLANCING OVER the New York newspapers,  
there seems to be no one in Gotham enthusias-  
tically and wholeheartedly in favor of Mr. La  
Guardia for mayor except Mr. La Guardia. And we  
wonder if he is still known to the postal au-  
thorities as Bloomington and not Porters Kidder.  
Oh, well, it won't be long now.

JUDGE FRED CARPENTER of Rockford says he  
is so carried away by "The Manchester Square  
Case" that last week he sent a letter to "Judge  
William C. Rafter, Porters Kidder, McLean County,  
Ill." The letter came back with the postoffice  
stamp on it, "No Such Postoffice in State." And  
Judge Carpenter sent the letter to us to prove  
that Bloomington is still known to the postal au-  
thorities as Bloomington and not Porters Kidder.  
Oh, well, it won't be long now.

THE EIGHTEEN DAY dieting thing is the only  
way to retain your youthful figure. That is, if you  
adopt our dieting schedule. Very well. Follow this  
column from day to day, and at the end of the  
eighteen days you will be so slim that it won't be  
anybody's business. On your mark! Ready! First  
day, for breakfast, one prune, cup of cold water;  
luncheon, two prunes, toothpick, half glass ice-  
water; dinner (or supper if you live in Evanston or  
St. Louis), three prunes, three-quarters glass cold  
water. There you are; go to it.

THE HIP SINGS and the On Leongs are at war  
again. Now that farm relief and the new tariff  
and dry south shooting have quieted down for a  
spell, and we were beginning to get used to bare-  
legged flappers and men wearing pajamas on the  
street and were about to turn over and get a little  
sleep, the Hip Sings and the On Leongs bust out  
on the front page. Can't a body ever get any rest?

MABEL WALKER WILLEBRANDT titles the  
story of her life "Is Prohibition a Success?" We'll  
let Mabel, be it?

### How to Keep Well.

By Dr. W. A. Evans.

To the limit of space questions pertaining to hygiene and prevention of  
disease will be answered in this column. Personal replies will be made to  
inquiries, under proper limitations, when returns stamped envelope is enclosed.  
Dr. Evans will not make diagnosis or prescribe for individual disease.

(Copyright, 1929, by The Chicago Tribune.)

### TYPES OF PARALYSIS.

YESTERDAY'S story was devoted to  
the carrier and the absorber  
types of infantile paralysis; the  
story of today deals with the  
nonparalytic and the paralytic types.  
These are the types which alert parents  
will suspect and alert physicians will  
diagnose.

A child headed for recognizable infantile  
paralysis will have a one day fever  
accompanied by some drowsiness, or  
some irritability, or some  
There may be either diarrhea, constipa-  
tion, or vomiting. After a day or two  
of illness the child recovers and remains  
well for about three days.

New parents who suspect infantile  
paralysis during this first stage, nor  
can they blame themselves or their phy-  
sicians. Then there starts up a second  
stage, in which the alert minded parents  
will suspect the trouble. In some cases there  
is no complete intermission between the  
two stages, merely a period of remis-  
sion during which the child is better  
but not well. In the second stage the  
child has a fever about 102 to 103. The  
pulse is a little too fast for the tempera-  
ture.

The mother notices that the child is  
restless, that he is crying, that he is  
anxious and is irritable. Now develop  
a symptom which a mother should not-  
ice: The child does not want to be  
held; the in-the-lap position causes a  
bath on the child's face. The mother  
who watches closely will note that the  
child trembles unduly. These symptoms  
should cause the doctor to be called. He  
will note that the child is too much  
restless for the fever and that the  
pulse is too fast. He will find other  
evidence that bending the neck and  
back causes pain. He will draw his fin-  
ger along the skin and will notice that  
in a few minutes well at the  
incision appears which is prominent and  
which persists. If he is not certain of  
his diagnosis at this time he will per-  
form the spinal canal and examine the  
fluid.

A reasonably careful physician should  
be able to diagnose nonparalytic infantile  
paralysis, though probably most  
cases of it will be missed. The disease  
certainly and physicians.

A certain minority of the children go  
on to the paralytic type of infantile  
paralysis, the type that is followed by  
wasting. The children of this group de-  
velop another line of symptoms which  
they have been sick several days. The

### A MATTER OF TRAINING.

A. L. writes: In these days of  
regarding my full speech? I used to go  
with a friend who stuttered and I teased  
him by making believe that I stuttered.  
Finally I began to really stutter seri-  
ously. I am now a stutterer. I would  
even undergo an operation if necessary.

REPLY:  
You should be able to train yourself out  
of this acquired bad habit. Operation with  
it is a waste. It is a matter of training.

REPLY:  
You should be able to train yourself out  
of this acquired bad habit. Operation with  
it is a waste. It is a matter of training.

### NOT DEMENTIA PARVOX.

R. P. writes: I have a terrible fear  
of insanity. Do you think that this is  
dementia parvox? I suffer with my  
nerves. This fear bothers me probably  
twice a week.

REPLY:  
I heard that dementia parvox could  
not be cured. Is this true?

REPLY:  
No. People with dementia parvox are often  
greatly improved by training and other treat-  
ment.

### FRIEND OF THE PEOPLE

Letters to this department must be signed with names and addresses of writers.

### ALBERT BRINGS ACTION.

Chicago, July 30.—(Friend of the Peo-  
ple.)—At the Washington street entrance  
to the alley south of Hirsch boulevard  
there is a big pile of plaster and other  
rubbish which was put there about two  
weeks ago by some people whose  
name is by. This pile extends halfway  
across the alley, blocking traffic. This  
could be done to make them remove  
this trash so that the alley will be  
clear.

Report is made that plaster complained of  
has been removed and alley thoroughly  
cleaned, pursuant to notice from the  
Board of Health. It was necessary to bring  
an arrest and court action to compel  
the violator to remove same.

JOSEPH J. BUTLER,  
Deputy Superintendent of Streets.

### INCORPORATING A CLUB.

Chicago, Aug. 2.—(Legal Friend of the  
People.)—Could you please give me in-  
formation dealing with steps necessary to  
incorporate a boys' social and ath-  
letic club consisting of young men about  
the age of 20 or 21.

Write to the secretary of state for printed  
forms.

TRIBUNE LAW DEPARTMENT.

### APPOINTING NEIGHBORS.

Chicago, July 26.—(Friend of the Peo-  
ple.)—Owner of building on opposite  
side of alley (behind 6400 block of North  
New avenue) throws ashes, paper and  
garbage on my sidewalk. A. B.  
will be greatly appreciated. A. B.  
Report is made that notice has been served  
on offender to clean up alley referred to and  
has been further dumped. Assurance has  
been given that the offender will be  
for complaint. In this district collection  
of refuse are made from the curb.

JOSEPH J. BUTLER,  
Deputy Superintendent of Streets.

### FROM THE TRIBUNE'S COLUMNS

#### 65 YEARS AGO TODAY

AUGUST 6, 1864.  
HARRISBURG.—The occupation of  
Harrisburg, Md., is confirmed. Three  
regiments of cavalry and two of in-  
fantry are strongly posted there. The  
fact that the rebel expedition is ac-  
companied by a large body of troops  
indicates that this force is the ad-  
vance of a large body, as such troops  
are not used for marauding purposes  
only. After crossing at Sheppard-  
stown a rebel train of 600 wagons, with  
ammunition, is being moved through  
Sharpsburg and Turkeysfoot. So sudden  
was their descent on Harrisburg that  
the telegraph operator was compelled to  
leave on a handcar, closely pursued by  
cavalry. The rebels also have entered  
Middleburg, eleven miles north of Har-  
risburg, but in what force is not known.  
At the same time another rebel column  
was reported crossing the Potomac at  
Cumberland.

BALTIMORE.—Persons who left  
Charleston, Va., early yesterday re-  
port that rebel forces, composed of  
Meade's and Imboden's cavalry, and  
cavalry, numbered estimated at 7,000,  
were about making a feint on Harper's  
Ferry, while Early, with 12,000 cav-  
alry, was starting up the valley from  
Bunker.

NASHVILLE.—Gen. Stoneman sent  
a force of 3,200 cavalry under Gen.  
Ed McCook to destroy the Macon and  
Western road in Georgia. They cap-  
tured a rebel train of 500 wagons, going  
from Atlanta to Macon, and were  
on their way back when a rebel force  
under Gen. Rains completely sur-  
rounded them. A desperate battle fol-  
lowed, during which 500 of McCook's  
men escaped. The number of federals  
captured, it is believed, will reach  
3,000. The disaster is attributed to the  
troops having taken too freely of  
liquors found in the captured train.

WASHINGTON.—It is no longer a  
secret that the rebels mean to assume  
the offensive, with as much vigor as  
possible, and that for this purpose they  
are sending reinforcements up the val-  
ley and attempting to cross the Po-  
tomac.

#### 10 YEARS AGO TODAY

AUGUST 6, 1919.  
CHICAGO.—The state public util-  
ities commission will announce the fol-  
lowing traction fares today: Surface  
lines, 7 cents; elevated roads, 8 cents.  
These increased fares, made neces-  
sary by the \$5-47 cent an hour wage  
scale awarded employees, will apply to  
rides within the city. Elevated fares  
to Evanston and suburbs to the west  
will be raised probably 1 or 2 cents.

CHICAGO.—The city council voted  
to employ 1,000 extra patrolmen until  
Sept. 15 because of the "unrest." The  
aldermen decided also to submit to the  
voters on Sept. 10 the question of ap-  
propriating \$800,000 for the employ-  
ment of 1,000 patrolmen during the re-  
mainder of the fiscal year.

CHICAGO.—Seven indictments  
charging fourteen persons with as-  
sault with intent to kill were returned  
in Judge Crowe's court by the grand  
jury investigating the race riots. All  
the indicted are Negroes. It was esti-  
mated yesterday that 15,000 Negroes  
were given food at the various relief  
depots in the riot zone established by  
the Red Cross.

MOUNT CLEMENS, Mich.—Testi-  
mony in the Ford-Townsend libel suit  
ended and the jury was dismissed  
until tomorrow, when the arguments  
will begin. These are expected to end  
by Aug. 12.

#### 30 YEARS AGO TODAY

AUGUST 6, 1899.  
CHICAGO.—The construction and  
operation of the Union Elevated rail-  
road loop has caused a decrease of  
from \$5,000,000 to \$10,000,000 in the  
valuation of real estate facing the  
tracks, and that for this purpose they  
are sending reinforcements up the val-  
ley and attempting to cross the Po-  
tomac.

NEW YORK.—Tod Sloan will re-  
main in America two weeks. He  
comes to see Sydney Paget, W. G.  
Whitney's racing partner. The ex-

### VOICE OF THE PEOPLE

Writers should confine themselves to 500 or 550 words. Give full  
names and addresses. No manuscripts can be returned. Address Tribune,  
The Tribune.

#### WILMETTE'S HOSPITALITY

Wilmette, Ill., Aug. 1.—Rash Jr.  
gave a right when he stated in his ar-  
ticle that Wilmette's lack in charging  
75 cents to check your clothing at the  
beach is to keep "the cheap Chicagoans  
away." As far as keeping the beach  
clean and dry place? why not  
let Chicagoans stay where they are and  
patronize their own beaches? We  
don't need them, nor do we want them  
up here. Who ever heard of north  
shore residents going to Chicago ex-  
pecting to enjoy their "beaches" there?  
Let Chicagoans stay where they are and  
patronize their own beaches.  
A WILMETTE RESIDENT.

#### EXCLUSIVE SWIMMING.

Wilmette, Ill., Aug. 1.—The people  
of Chicago have known for years that they  
are not wanted at the Wilmette beach,  
but still they insist on peering us every  
year. You have miles of lake you  
swim; why not get the city of Chicago  
to make beaches for you? You talk  
about a dirty bathhouse. Well, it cer-  
tainly can't be any dirtier than some of  
the people of Chicago who visit our  
beaches.

Our beach house isn't much now, but  
when we build a new one it will be  
something we can brag about. We hope  
by then that the people of Chicago have  
taken our hint and stay in their own  
back yard.

M. P.

#### RECREATION.

Chicago, Aug. 1.—If Wilmette wants  
to bar Chicagoans from their royal lake  
kingdom, then let us Chicagoans bar  
these would-be aristocrats from the  
city of Chicago.

CONFIDENTIAL LARK.

#### HOOKER URBANITY.

Richmond, Ind., July 21.—Many  
strange and amusing things are broad-  
cast from your interesting town but  
none more remarkable than the con-  
troverly which raged about women smok-  
ing in a handsome new woman's club-  
house.

It would seem in so sophisticated a  
center as Chicago such provincialism  
would hardly be rampant. Now here in  
Richmond, Ind., a town of some 25,000  
people, women smoke any place and as  
soon as they get to it.

The truth is that in America we con-  
fuse manners with morals. Smoking is  
a mere social gesture and means  
nothing.

Why do your leading ladies not get  
at something of vital importance? Be-  
say, bringing to bar those concerned in  
the murder of a woman in the state of  
Illinois for having some homemade wine  
in her cellar? BURNHAM CHAPMAN WATTS.

#### THE MORALITY OF MORAL REFORMERS.

Chicago, Aug. 1.—I desire to commend  
your excellent editorial, "The Morality  
of Moral Reformers." Those who de-  
mand much of others should not within  
and whimper when much is demanded  
of them.

Certainly a minister should not shoot  
unless he is willing to be shot at. The  
southern bishop who was so severe in  
dealing with southern Democrats who  
do not want to let their party ought not  
to become angry when his so-called  
enemies, whom he went out of his way  
to create, ask him to explain how he  
came to invest his money in a ques-  
tionable Wall street concern.

The truth of it is, no minister of the  
gospel has any right to dabble in party  
politics unless he is sportsman enough  
to take as well as give. The reformer  
does not have an easy place to fill and  
he should count the cost before he at-  
tempts to correct the morals of his fal-  
low men.

The writer is one of the southern  
Democrats who sided by the party of his  
forefathers, though he is in favor of  
the "unrest." The vicious and stonewall  
enemies of the great old Democratic  
party of Jefferson, Jackson, Cleveland,  
and Wilson, referred to it as "the party  
of rum, Rome, and rags," and strag-

#### NEGRO BEACHES.

Chicago, Aug. 1.—By all means  
prove beaches in the colored zone and  
give them police protection, life pres-  
ets and the exclusive right to their

into the colored bathing.

A. LARSEN.

#### ALTERNATIVES.

Whitney Jay says that a new  
of gas, a shell fragment in the  
or a bayonet in the gut would be  
attractive to me or any other man  
histrionic stunts in preference to  
his father's knock down, his rap-  
id and himself improved into a  
tary service under dominating  
of a conqueror.

My son has been trained in the  
T. C. and the coast artillery and  
if he did not defend the country  
has afforded him the advantages of  
free people I would advise him to  
back to the land from which he came.

Jump the channel?"

## REDS IN TRANCE, TALK ROT, SHAW INFORMS LABOR

Sage Offers Advice to Britain's Radicals.

BY JOHN STEELE.

LONDON, Aug. 5.—Admitting that he is a "bourgeois socialist" at the age of 72, but might become a radical at 75, George Bernard Shaw, famous dramatist, handed out some friendly advice to Great Britain's radicals in an address today to the Independent Labor party school at Weymouth.

"I am a bourgeois socialist, and there is not one of you who could possibly be mistaken for anything else," Mr. Shaw exclaimed to his hearers, who were mostly Labor party leaders. "There is not one of you who could be taken for a horny handed son of the soil, and this is very significant, because there is hardly any class which understands the working class less than our class does."

Communists Still Dreaming. The sage described the communists as "still dreaming and talking a lot of rubbish about the working classes."

"The Labor party is not exactly popular," he continued, "but is the only party not unpopular. The people voted for labor because the others were so hopeless."

He ascribed the defeat of the Conservative party in the general election to the failure to realize the value of "political window dressing."

With his typical irony he counseled the Laborites about too much confidence in the people.

People Unaware of Affairs. "No good statesman can feel that his people are entirely at his back," he said. "Owing to the ignorance and political imbecility of the people difficult things are done, but most extraordinary things can be done without letting the people know."

Poincare May Leave Clinic, but Faces New Operation.

PARIS, Aug. 5.—The progress of former Premier Poincare from his recent operation continued satisfactory today, but it will be several days before he is able to leave the clinic. The date for the second operation will not be fixed before the end of August.

THE FIRE BALL. PA. AUG. 5.—Thanks to the great fireball of July 19, 1928, which has been recorded in the sky, a small object was an unusual object showed several peculiarities, so it will receive attention. However, from data available, it was several months to come to the writer's notice. The writer desires to thank the Chicago Tribune for its copy of the article, which was eventually to be published in the University of Pennsylvania.

## DRUG CRAZED INMATES OF NARCOTIC ASYLUM RIOT AND 13 ESCAPE

Los Angeles, Cal., Aug. 5.—(AP)—Thirteen inmates of the Spadra state narcotic hospital escaped today during a riot in which frenzied patients used improvised battering rams to demolish doors and knock the bars from windows. Craving for narcotics was believed to have caused the break. Authorities quelled the rioters by threatening to use sawed off shotguns and tear gas bombs. No one was injured.

The disturbance began in an isolated ward and spread rapidly. Three men, accused of being ringleaders, were held. They are Bobby Hall, 39; William Graham, 60, and Charles E. Rivers, 42.

More than 30 inmates have escaped since the establishment of the hospital about a year ago.

## Find Hotel Guest Dead in Room, Throat Slashed

A man who registered on Sunday night as Tony Broten of Tacoma, Wash., was found dead with his throat cut last night in his room at the New Southern hotel, 1215 South Michigan avenue. A letter from his sister in Tacoma was found in his pocket. It was addressed to him in care of the Dayton, O., baseball club, but had been forwarded to Erie, Pa. Police notified Dayton and Tacoma authorities.

Records show that he was not a resident of Tacoma.

Wear resisting quality, neat appearance and sure-footed traction are maintained at the same superior standard as before.

## DAWES FINDS HIS COAT OF ARMS IN ENGLISH BOROUGH

Traces Family Tree Back to Charles II.

(Chicago Tribune Press Service.)

SUDBURY, England, Aug. 5.—The good folk of this ancestral home of Gen. Dawes continue to take about the old town records for new facts about the family history of the American ambassador, who is to be given the freedom of the borough on Oct. 1. It develops that the American branch of the Dawes family has long had the right to use the coat of arms of Abraham Dawes of Putney, who suffered under Cromwell and was made a baronet by Charles II. at the Restoration.

The shield bears three swans on a bend in a field of six battle axes. The crest is a dragon supported by a battle ax. The baronetcy is extinct. The founder of the American Dawes family was William Dawes of Sudbury, who sailed to New England in 1635. He was a boy of 15 and, like his father, a stonemason, when he sailed in the ship Planter on April 6 of that year.

Records show that he was not a resident of Sudbury.

He settled in Boston, where he built for himself a family mansion on the east side of a lane afterwards called 'Sudbury street.' Five generations of our family lived in this house until it was pulled down in 1776."

4 ARRESTED FOR BLASTING DRUG STORE, KILLING 3

Kansas City, Mo., Aug. 6 (Tuesday).—Durward Dailey, owner of the drug store in which an explosion killed three firemen and injured eleven others here early yesterday morning, has named the men responsible for the blast, police said early today.

Police were holding three men besides Dailey and were seeking three others. Those held were John L. "Pat" Crowe, manager of the store; Durward Pigott, owner of another drug store, and a man whose identity was withheld. The latter, police said, was one of two men who delivered some gasoline or naphtha to the store.

There have been recent repeated cases of alleged arson and bombing here.

Dawes settled in Boston, where he built for himself a family mansion on the east side of a lane afterwards called 'Sudbury street.' Five generations of our family lived in this house until it was pulled down in 1776."

4 ARRESTED FOR BLASTING DRUG STORE, KILLING 3

Kansas City, Mo., Aug. 6 (Tuesday).—Durward Dailey, owner of the drug store in which an explosion killed three firemen and injured eleven others here early yesterday morning, has named the men responsible for the blast, police said early today.

## To Advertising Agents and National Advertisers

*Let's Get this Straight!*

During the first six months of 1929 the Post-Dispatch continued its long-time supremacy in National Display Advertising in St. Louis by carrying

**2,623,040 Lines**

Which is the largest volume of National Display Advertising ever carried in any similar period by any St. Louis newspaper—morning or evening.

This record was made regardless of the fact that the other newspapers carried thousands of lines of National Advertising not acceptable to the Post-Dispatch.

*first*  
in Advertising - - - -  
in News and Features  
in St. Louis Circulation  
Daily or Sunday

In June alone other St. Louis newspapers carried a total of 49,232 lines which the Post-Dispatch would not accept. Of this total

The Globe-Democrat carried 20,236 lines  
The Star carried.....17,858 lines  
The Times carried.....11,138 lines

During the same period the Post-Dispatch carried more local advertising, more real estate advertising and more want advertising than the Globe-Democrat and The Star COMBINED.

## Transparent Velvet Is Well-Browned in New Frocks and Ensembles for Fall

### \$39.50

Transparent velvet as light and supple as crepe catches dusky brown tones important for Fall—besides deep blues and black. A fashion that appears in three-piece suits . . . in informal frocks . . . in frocks that are almost tailored!

Sketched left—Smaller women's transparent velvet frock. Sizes 35½ to 42½—\$39.50.  
Sketched center—Women's in sizes 34 to 44—\$39.50.  
Sketched right—Misses' velvet frock, sizes 14 to 20—\$39.50.

Mandel's Frocks—Fourth Floor—State and Madison.

## The Velvet Turban Changes Its Moods By the Tie of a Bow

### \$10

A Snug Little Cap Shirred to Fit the Head and Boasting Two Ties

And you may tie it as a sophisticated version of the Spanish fashion that sponsors a bow at the nape of the neck . . . or as an ultra-chic bandana that ties at the top of the head . . . or as a more formal mode wrapped around and fastened with a tiny pin in back! In all headsizes.

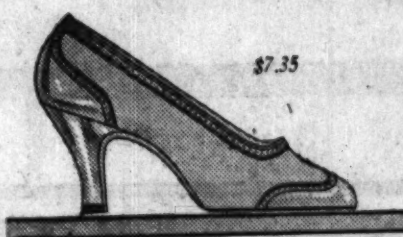

1,000 Hats—felts and straws—reduced for clearance to, each, \$2.95

Mandel's New Millinery Salon—Fifth Floor—State.

**MANDEL BROTHERS**  
STATE AT MADISON

## Value Leaders in the August Sale of Shoes

### \$8.65

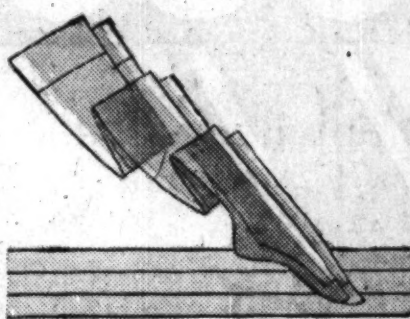

Unusual quality in all these at \$8.65—and such styles as beige kid, white kid, brown, red, slate blue, gunmetal, patent leather, and many others. Pumps, oxfords, woven sandals, and strap slippers. Size ranges are broken, but your size is in the lot.  
At \$7.35—Linen and shantung. At \$9.85—Lizard, snakeskin, white and colored kids. Also at \$8.65—Arch-Aid strap style slippers at August Sale price.

Mandel's Shoes—Fifth Floor—Madison.

## Gordon Hose at New Price

### \$2 Pair

In the Favored V-Line Style

A remarkably low price for this famous hosiery in service and chiffon weights. The new colors are Blush-tan, Coronado, Diane, Rachelle, and others. Specially priced, \$2.

Mandel's Hosiery—First and Fifth Floors—State.

## Cool Note Is Struck in Abbreviated Silk Lingerie

### \$2.95 Each

Exceptional Purchases of Chemises and Step-ins, Bloomers and Petticoats

All these bits of lingerie have the charm of fine workmanship and daintiness. They were purchased at a special price by Mandel buyers for vacationists—but whether you go away or not you can find use for underthings with the good points of these.

Step-ins—amusingly French in type or plain step-in style with tabs. These are tailored of georgette and crepe de chine.

Chemises—of crepe de chine, tailored or trimmed with imported Breton laces.

Bloomers—These are brief affairs with the comfortable yoke in front and adequate fullness. Simply tailored of crepe de chine.

Petticoats—have wide hip hems and flat fronts, tailored or are trimmed with Alencon-type laces all around the bottom.

Mandel's Lingerie—Third Floor—State.

## Discovering Lost Waistline

### \$7.50

With the Aid of Nature's Rival Girdle-Brassiere

The Princess silhouette is again the favored mode, and decidedly it demands a girdle that defines the waistline and confines the hips. Too, it must leave the waist supple and natural in line. For these frocks and others you will find the Nature's Rival girdle-brassiere a perfect garment.

They're Cool and Comfortable

They have been designed for warm weather wear and are made of Summer weight broche and surgical elastic for coolness. Light boning in the back and over the abdomen, and a brassiere top of lace. Adjustable shoulder straps. Sizes 34 to 42.

Mandel's Corsets—Third Floor—Wabash.

**MANDEL BROTHERS**  
STATE AT MADISON

Kaffe Caracul with Kolinsky, \$425, Size 18.

Kaffe Caracul with fur, \$375, Size 18.

## CARACUL

Sponsors a New Brown in Coats

"Kaffe"

Featured in Mandel's August Sale of Furs

A new dusky tone of the most important color of the season . . . a brown with a touch of dark rust color in it that gives richness to deeper browns worn with it . . . that brings out unsuspected tones on lighter browns—and that is an important complement for the clear bright shades in frocks for Fall and Winter!

August Sale Prices \$295 to \$1,125

Sizes from 16 to 40

It is most important in the flat uncurled caracul because it tailors to slim line and may be manipulated for interesting flares, the cape collar, unusual cuffs. It is ultra-chic untrimmed, but Kolinsky, dyed squirrel, natural blue fox, blended Jap mink are contrasts in collars and cuffs.

## Four Mandel Advantages

A long-established department that KNOWS furs, fashions, value.

Specialized sizes to fit and becoming to all women, misses, Junior Misses, larger women—and for CHILDREN.

A large department—which means better and more varied selection.

Mandel's Fur Department—Fifth Floor—Wabash.

In Mandel's August Sale of Furs, a deposit will hold any coat for you. You may have your purchase posted on November First statement, if you have a charge account.

Any furs purchased in August Sale will be stored in Mandel's fur vaults until November 1st, free of charge.

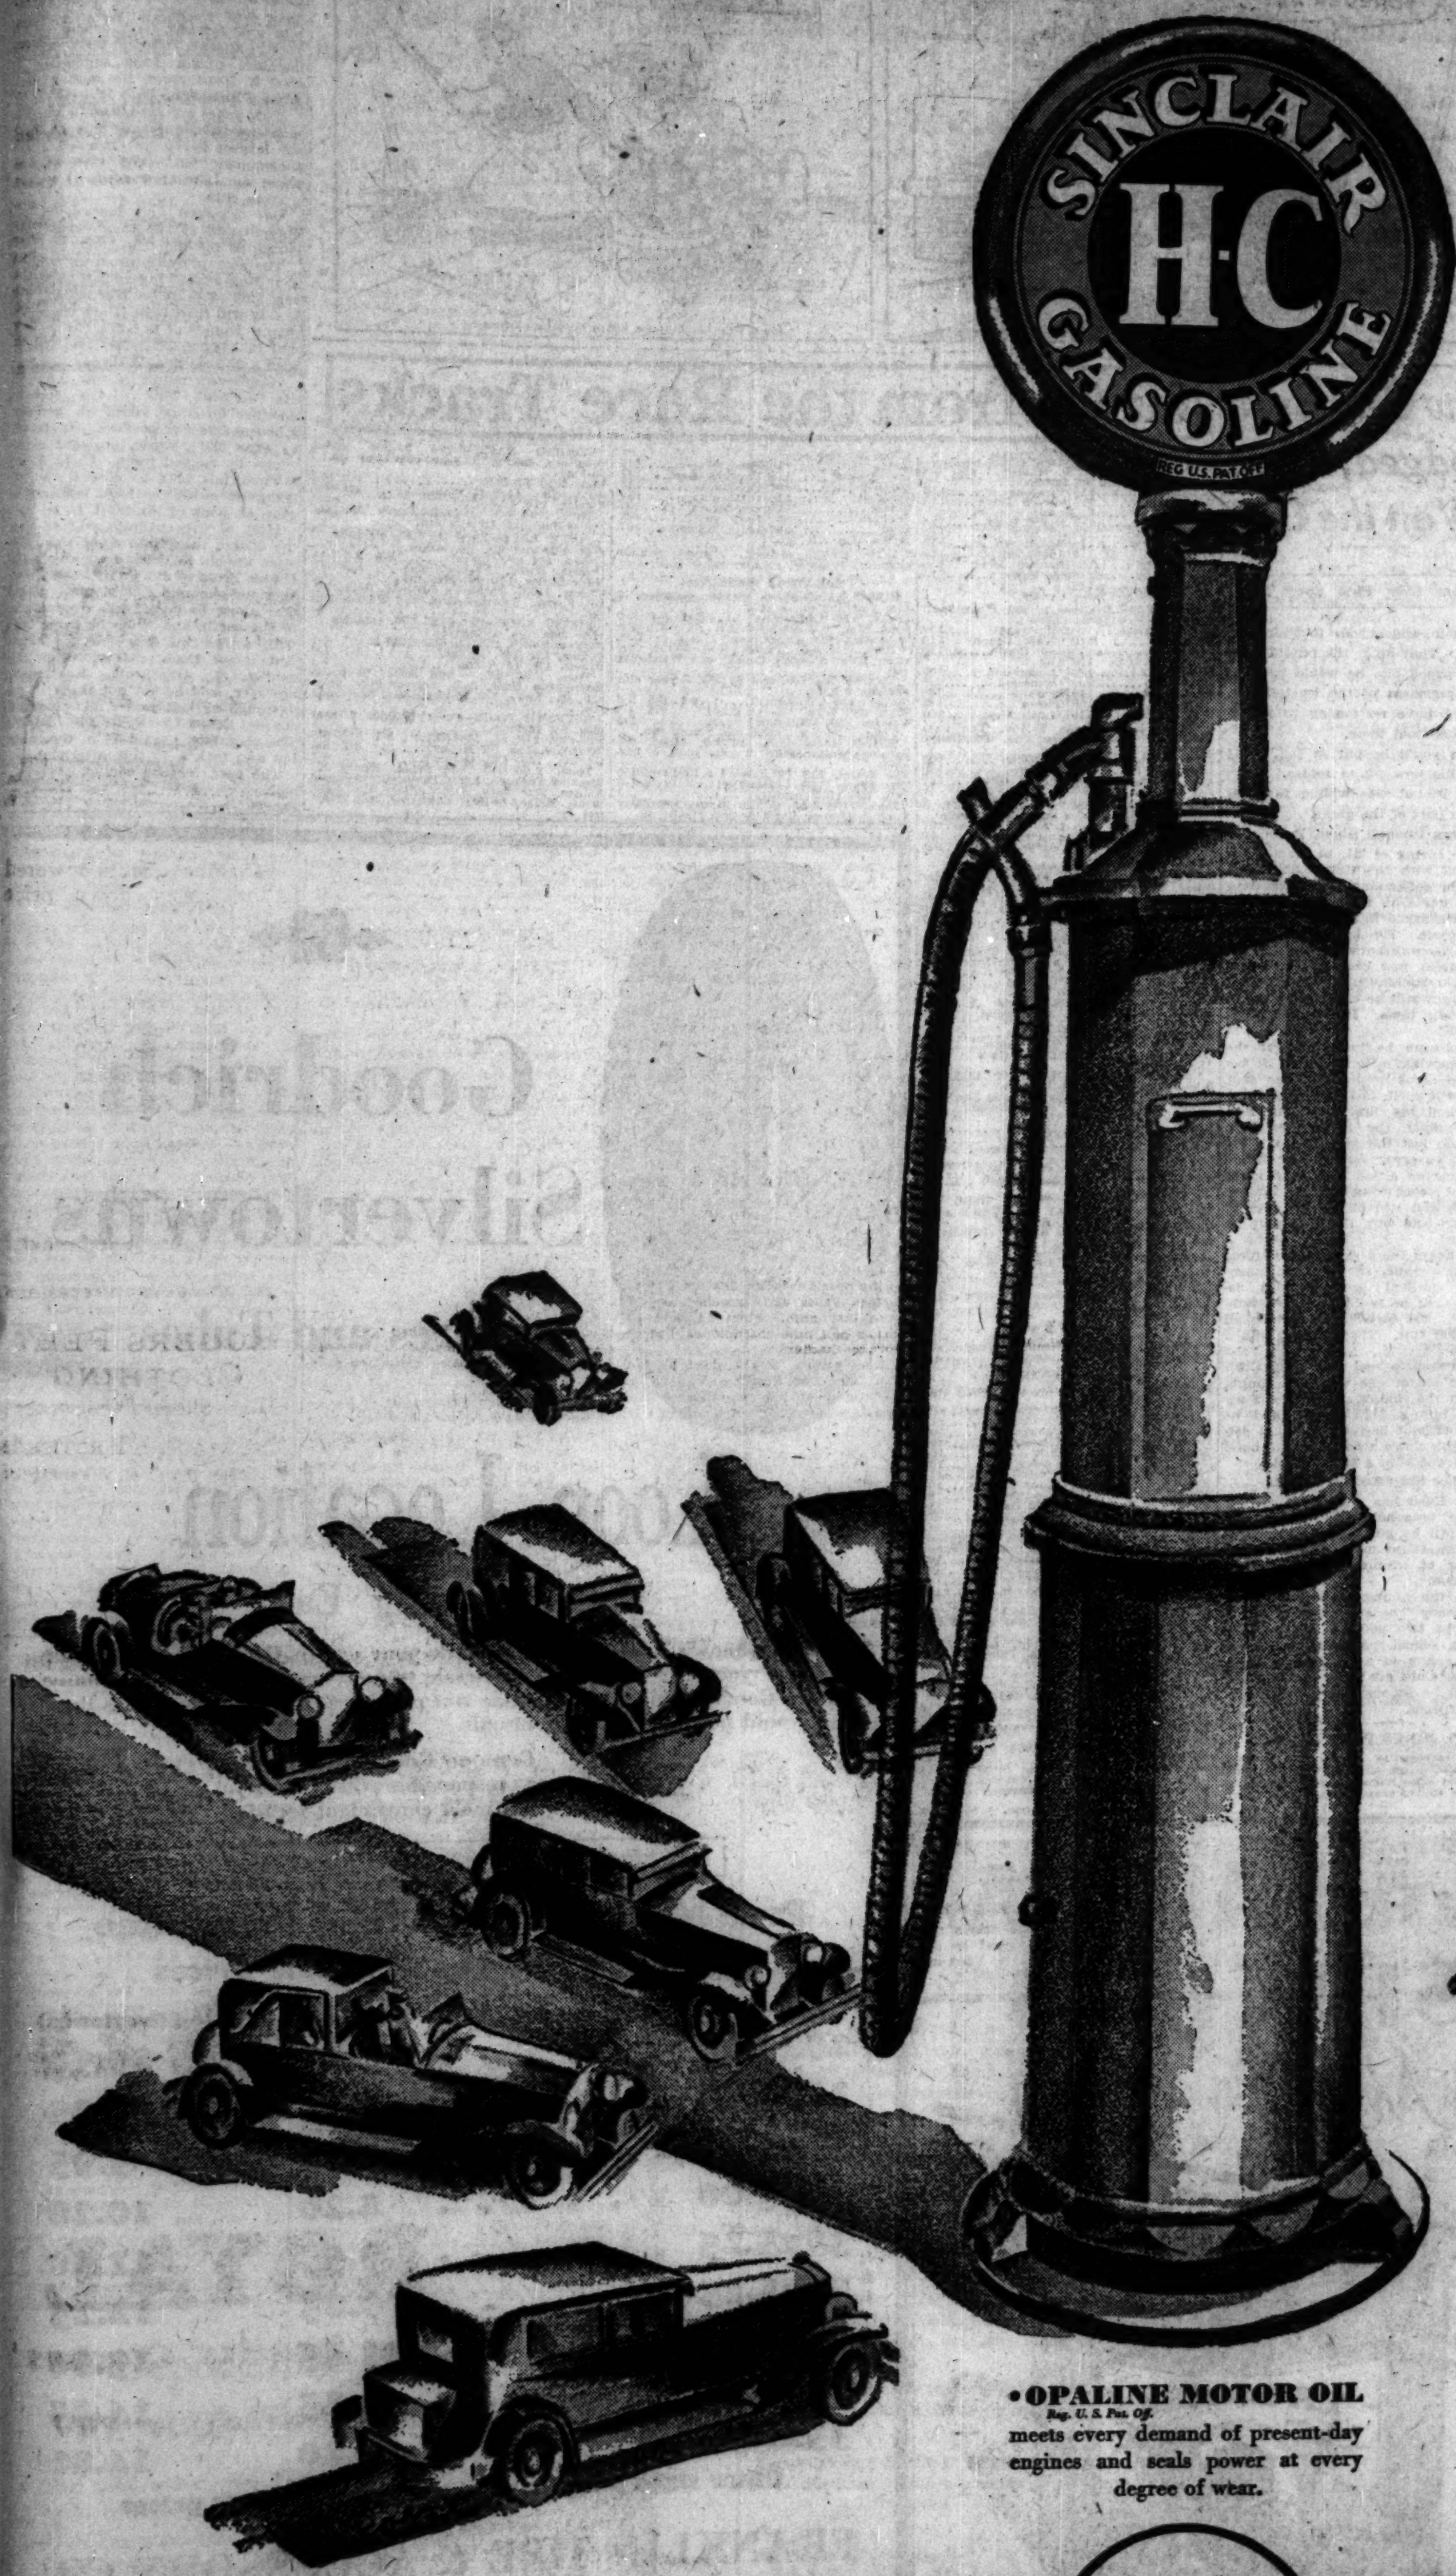

# Stop FOR THE GAS THAT *Stops Knocks!*

... Here is  
Highway  
Contentment  
for You!

**Y**OU like motoring—except in traffic. You like your engine—except when it knocks. You like to be behind the wheel—except when you have to be behind a line of cars because your engine hasn't enough pep, spurt and action in low gear to give you complete confidence in its performance.

Very well!—here's the gas that *will* give you complete confidence—here's the gasoline that will give you superior engine performance—will keep your car on its toes for the short spurts and sprints in traffic—keep your engine smooth, quiet, powerful on the open road.

For motoring pleasure, try the modern motoring fuel—Sinclair H-C Gasoline—it will never disappoint you. It's all gasoline—nothing added. For Highway Contentment fill up wherever you see the Sinclair H-C Pumps—and go over the hill in high!

• OPALINE MOTOR OIL  
Reg. U. S. Pat. Off.  
meets every demand of present-day  
engines and seals power at every  
degree of wear.

# SINCLAIR **H-C** GASOLINE

## WHEAT PRICES 13 CENTS BELOW RECENT HIGH

Market Bulges Bring In  
Selling Orders.

BY CHARLES MICHAELS.  
Scattered liquidation was on in wheat yesterday with stop loss orders caught on the way down and prices at the inside were off 3/4¢ to 1/2¢ from Saturday's finish, and 1 1/2¢ to 1 3/4¢ under the high of a week ago. Scattered rains in the Canadian northwest more than offset reports of frost from Alberta and Manitoba and all bulges brought in selling orders, with the finish at net losses of 1/2¢ to 1 1/4¢ lower, a strong rally coming toward the close. Oats were 1/4¢ to 1/2¢ lower. Rye lost 1/4¢ to 1/2¢.

Record Gain in Viable.  
Wheat is accumulating at American terminal markets at a record rate, the gain the last week being 17,167,000 bu. and has increased 23,079,000 bu. in the last two weeks, with stocks now aggregating 137,387,000 bu. against 62,316,000 bu. The record increase had considerable influence on values, as further accumulation is looked for, although the onset of the winter wheat movement seems to have passed, and primary points received 17,167,000 bu. or 1,212,000 bu. less than a week ago. There was a decline of 1/4¢ to 1/2¢ in the local spot basis, with No. 2 hard sold as low as 9 1/2¢ under September, the lowest figure known at this season of the year, and reflects the scarcity of storage room.

Crop comments from the spring wheat area showed little change, with cutting under way on a small scale in parts of the Canadian northwest. It is too early to determine whether the frost of Monday morning did any damage or not in the three provinces. The forecast indicated somewhat cooler weather. Winnipeg and Liverpool were closed. The latter market is due 3 1/4¢ to 4¢ lower, based on the action of Chicago since the opening on Saturday. Export demand was limited.

Corn in Good Rally.  
While no further rain of consequence was shown over the corn belt over the week end, moderate temperatures were favorable for the crop, and with wheat weak the local element were free sellers, causing a decline of 2 1/4¢ to 3 1/4¢ from Saturday's finish. Holders of bids and commission houses bought on the break, and a rally of 1 1/4¢ to 1 1/2¢ came toward the last. Cash grain was in fair demand with shipping sales of 128,000 bu. Viable supply decreased 1,453,000 bu. for the week, and the total is 8,571,000 bu. against 12,287,000 bu. last year.

Commission and cash houses were aggressive buyers of oats and liquidation by tired longs and local pressure was readily absorbed. The buying was on scale orders. Spreaders bought September and sold December at 4 1/4¢ difference. The viable increased 223,000 bu. for the week.

Buying of rye futures by houses with eastern and foreign connections offset to a large extent the weakness in wheat and the market showed independent strength. There was also buying of rye against sales of wheat by locals. Nothing was heard regarding export demand at the seaboard.

## CASH GRAIN NEWS

Foreign demand for cash grain at the seaboard and Gulf was slow, but in part to the holiday in Liverpool. Local handlers sold 12,000 bu. wheat, 129,000 bu. corn; 78,000 bu. oats and 5,000 bu. barley to the domestic trade. Some charters were made for wheat and corn, but figures were not given.

Cash wheat in the local market dropped 1/4¢ to 1/2¢ as compared with the future to a new low on the crop with No. 2 red quoted at 8 1/4¢ under; No. 2 hard, 8 1/4¢ under; and No. 1 northern, 8 1/4¢ under September. Basis on cash corn was steady to 1/4¢ lower with No. 2 mixed 1/4¢ to 1/2¢ under; yellow, 1/4¢ to 1/2¢ under; and white, 1/4¢ to 1/2¢ under September.

Official receipts of grain at Chicago Monday: Wheat, 1,417 cars; corn, 313 cars; oats, 240 cars; rye, 25 cars; barley, 21 cars.

# STOCK MARKET STARTS WEEK A LITTLE GROGGY

helped to swell the volume of selling. Another factor on the bear side was the renewed cropping up of the time worn rumor—denied any number of times but still apparently as persistent as ever—that Secretary of the Treasury Mellon is preparing to resign. Mr. Mellon was not in Washington today, but high officials there were quoted as usual as holding the report without foundation. It continued in circulation throughout the day, however, and no doubt sounded convincing to a considerable group of traders.

**Utilities Lead List.**

As usual the utilities made the best showing as a group and a full dozen or more of them were carried to new high price records for the year. Buy- ing was particularly spirited in the principal Pacific coast issues, which in the street heard are involved in a big merger move, and in Consolidated

Gas and Brooklyn Gas, which were also mentioned in some of the rose 9 1/2 points of the day's trading. Southern California Edison closed with a gain of nearly two points, its credit after having been points to 1 1/2 at 11:15. There is a well defined belief that the road's dividend will be increased from the \$4 basis when the directors meet for action about two weeks hence.

**Rails in Demand.**

Some of the other rails were in demand at one time or another, among them being Atchafalaya and Erie. New York Central ran into selling and a bid of some 2 points, as did Baltimore and Ohio.

Steel common, Bethlehem, American, General Electric and several other leaders of last week's advance in the background and reacted under rolling sales from one to more than six points. General Electric was the hardest hit of the group. Substantial breaks also occurred in American Can, Commercial Investment Trust, Shattuck, and Stone and Webster.

A minor feature of the day was the advance to a new high of International Silver on brisk trading. The company is experiencing a much heavier demand for its product than in previous years, and the street heard that the increase of something like 70 per cent over the rate of the corresponding period of last year was being considered.

The market had to contend with the Bank of England discount rate today. Many observers who are satisfied that the bank's position calls for a higher rate are anticipating the announcement of an advance at the Thursday meeting. Cable news quoted London financial leaders as saying that a higher rate was essential.

And seemingly unprovoked. A boost in the rate probably will be reflected in the recall of some London funds now being employed here and might result in an increase in the local bank rate.

**Another Investment Trust Formed; Capital \$5 Million**

New York, Aug. 5.—An investment trust to be known as the General Capital Corporation, with an initial capital of \$5,000,000, all in common stock, has been formed by a group of Boston and New York capitalists. They include Roland W. Boyden, former member of the United Fruit company; Matthew C. Brush, president of the American International corporation; and Daniel G. Wing, chairman of the First National bank of Boston.

The authorized common stock of the General Capital Corporation was given \$100,000,000 no par shares was given by stockholders yesterday. The change will be effected by substituting the additional common stock for the \$100,000 shares of authorized preferred stock, none of which was outstanding.

The American Milling company, manufacturer of animal and poultry feeds, declared a special cash dividend of \$2.50 a share. Stockholders of record Aug. 10 will receive the dividend which is payable Aug. 15.

**JOHN D. RYAN.**  
A. L. Ryman, formerly president of the American Can company, has been elected a director of the United Fruit company of America.

**APPROVE PLAN TO BOOST BRONZE COMPANY STOCK**

Approval of the plan to increase the authorized common stock of the General Capital Corporation was given by stockholders yesterday. The change will be effected by substituting the additional common stock for the \$100,000 shares of authorized preferred stock, none of which was outstanding.

The American Milling company, manufacturer of animal and poultry feeds, declared a special cash dividend of \$2.50 a share. Stockholders of record Aug. 10 will receive the dividend which is payable Aug. 15.

**STOCK MARKET**

CHICAGO STOCK EXCHANGE

over. The result was no little uncertainty in price movements throughout a good part of the list.

News was not especially important in its bearing on the situation, but a rise in the money rate to 12 per cent

helped to swell the volume of selling. Another factor on the bear side was the renewed cropping up of the time worn rumor—denied any number of times but still apparently as persistent as ever—that Secretary of the Treasury Mellon is preparing to resign.

Mr. Mellon was not in Washington today, but high officials there were quoted as usual as holding the report without foundation. It continued in circulation throughout the day, however, and no doubt sounded convincing to a considerable group of traders.

Gas and Brooklyn Gas, which were also mentioned in some of the rose 9 1/2 points of the day's trading. Southern California Edison closed with a gain of nearly two points, its credit after having been points to 1 1/2 at 11:15.

**Another Investment Trust Formed; Capital \$5 Million**

New York, Aug. 5.—An investment trust to be known as the General Capital Corporation, with an initial capital of \$5,000,000, all in common stock, has been formed by a group of Boston and New York capitalists.

The authorized common stock of the General Capital Corporation was given \$100,000,000 no par shares was given by stockholders yesterday. The change will be effected by substituting the additional common stock for the \$100,000 shares of authorized preferred stock, none of which was outstanding.

The American Milling company, manufacturer of animal and poultry feeds, declared a special cash dividend of \$2.50 a share. Stockholders of record Aug. 10 will receive the dividend which is payable Aug. 15.

# U. S. GIRL TELLS OF NIGHT SWIM IN YACHT CRASH

## Egyptian Prince's Boat Is Wrecked on Rocks.

(Overnight, 1929; by the New York Times.)  
PARIS, Aug. 5.—A graphic description of her shipwreck experience and of swimming ashore to the coast of Norway was given tonight in Paris by Miss Margaret Woolf of Rochester, N. Y., who was one of two guests aboard the palatial vessel. The yacht foundered on July 13.

Miss Woolf, who is the daughter of the late Martin Woolf of Rochester, met the Egyptian prince and princess while traveling in Egypt and came aboard specially to accept their invitation to accompany them on an extended cruise in the Baltic and North seas. They left from Copenhagen, going to Riga, Finland, and other points, and, after visiting Stockholm, were going along the coast of Norway when the accident took place. The ship was a large, luxurious Diesel yacht named Nas Ferwer, with a crew of more than thirty. The yacht was in charge of two Norwegian pilots.

"We had been listening to a radio concert late that night broadcast from a big London vaudeville house and witnessed the most beautiful northern sunset," said Miss Woolf. "When we retired for the night it was still light, as it remains almost twilight all night long at this time of the year. The sea was absolutely calm."

"I was asleep when awakened by a terrific crash which shook the entire vessel and I was thrown partly out of my berth. Realizing the ship was already listing badly, I ran in my night dress out into the saloon where I found the prince and princess also in night clothes. The ship was tipping so that I kept slipping against the wall and then water began coming in on top of men through the portholes. "By the time they reached me, it was easy to see that the yacht was going to sink. It had already turned partly over in the water and I had difficulty in climbing over the rail, which tilted sharply towards me."

Forget Life Belts.  
"We were about 200 yards from a rocky shore. None of us even thought of getting life belts until it was too late and too late to save any of our belongings."

After I crawled over the boat's side, clinging to a rope I let myself slide into the water and began swimming. "The sailors, who were mostly Arabs, also began jumping into the water, making for the shore. The princess, who couldn't swim well, was helped by two sailors and almost the last to jump, except the captain, was the prince."

Swam in Night Dress.  
"We all clambered ashore over slimy rocks, most of us almost entirely unclothed. My night dress was torn and a sailor gave me an Arab cape which was wringing wet. One of the ship's officers still wore his hat but had no trousers. We were a bedraggled lot. But it was not until some time afterwards that we learned one man had been lost. He was the ship's carpenter who had lashed himself to the rail. His body afterward was recovered by divers."

About an hour after the wreck a small motor launch came by towing a lifeboat. It was people from a small village seven miles away who had heard the crash the night made striking the rocks and had come to investigate."

# Elmer's Radio Catches Sunday Program's Echo

BY ELMER DOUGLASS.

In some respects radio last evening took on the aspects of an afterglow of Sunday evening's spectacular outburst following the arrival of the Graf Zeppelin. Floyd Gibbons, in his talk from New York, through W-G-N, 930 to 10, described his own experience as an announcer on Sunday evening. Mr. Gibbons incidentally described his experiences in Europe with dirigibles.

Excitement that was as instructive as it was entertaining was furnished throughout the night long at this time of the year. The sea was absolutely calm.

"I was asleep when awakened by a terrific crash which shook the entire vessel and I was thrown partly out of my berth. Realizing the ship was already listing badly, I ran in my night dress out into the saloon where I found the prince and princess also in night clothes. The ship was tipping so that I kept slipping against the wall and then water began coming in on top of men through the portholes. "By the time they reached me, it was easy to see that the yacht was going to sink. It had already turned partly over in the water and I had difficulty in climbing over the rail, which tilted sharply towards me."

# VEBLEN, NOTED ECONOMIST AND AUTHOR, IS DEAD

Palo Alto, Cal., Aug. 5.—(AP)—The death of Thorstein B. Veblen, noted economist and author, was revealed here today. Prof. Veblen died at his Menlo Park home Saturday from heart disease, at the age of 72. He left only a daughter, Miss Rebecca Veblen.

Known best for his work on "The Theory of the Leisure Class," Veblen had a long and brilliant career. He retired two years ago from the faculty of the new School of Social Research in New York and devoted himself solely to his work of translation from many languages and the writing of essays.

Born in Minnesota, of Scandinavian ancestry, Veblen took his A. B. degree at Carleton college in 1880 and after serving as a fellow at Princeton obtained his Ph. D. degree at Yale in 1884. He was an assistant professor at the University of Chicago, a lecturer at the University of Missouri, and was associate professor of economics at Stanford university from 1906 to 1909.

# Austrian Edison Dies at 71 After Short Illness

(Chicago Tribune From Service.)

VIENNA, Aug. 5.—The man who invented the mechanical cigarette and cigar lighter, Dr. Karl Auer Freiherr von Welsbach, died at Klagenfurt at the age of 71 after a short illness. Known as the Austrian Edison, Dr. Auer's greatest contribution to progress was probably the development of the 1897 pliable metal filaments to replace the carbon in Edison's original electric lamp, thus extending its usefulness a hundred fold. He also invented the incandescent gas mantle called after his title "the Welsbach mantle."

# John C. Ely, Sculptor, Drowned While Swimming

Dennis, Mass., Aug. 5.—(AP)—John C. Ely, 39, of Seattle, Wash., a sculptor connected with the American Museum of Natural History at New York, drowned here while swimming late yesterday.

Mr. Ely was seen by one son, Henry Ely Jr., and three daughters, Katherine, Maude and Josephine Lewis. Burial will be in Chicago.

# R. L. BULCKLEY, 95, EMPLOYEE OF CITY, DIES; RITES TODAY

A delegation from the office of County Clerk Switzer will attend the funeral at 8 p. m. today of Robert L. Bulckley, the oldest man in the county clerk's office, who died on Sunday at the Alexian Brothers hospital. Mr. Bulckley, despite his 95 years, was active until he caught cold sixty days ago. The funeral service will be held from a chapel at 923 Belmont avenue. Interment will be in Graceland cemetery.

# Henry F. Donovan, Editor of Political Paper, Dies

Henry F. Donovan, known as the publisher of a political newspaper, died last night at his home, 735 Wesley avenue, Oak Park. Mr. Donovan was a newspaper man in his early years. He entered politics in 1883 and served several terms in the county offices and later as clerk of the superior court. He is survived by a son, John M., and a daughter, Mrs. Cornelia Deane. Funeral services will be held Thursday morning from the home. Burial will be in St. Boniface cemetery.

# J. Pierpont Morgan's Aunt Dies in the East

Swampscott, Mass., Aug. 5.—(U.P.)—Mrs. George H. Morgan, prominent society leader and aunt of J. Pierpont Morgan of New York, died here today after a lingering illness.

# Deaf Hear Again Through New Aid

Earpiece No Bigger Than Dime Wins Enthusiastic Following Two-Day Free Trial Offer

After twenty-five years devoted exclusively to the manufacture of scientific hearing aids, the Dictograph Products Co., Inc., Dept. 509-M, 180 North Michigan Blvd., Chicago, Ill., has just perfected a new model. Accutone that represents the greatest advance yet made in the re-creation of hearing for the deaf. This latest Accutone is featured by a tiny earpiece no bigger than a dime. Through this device, sounds are clearly and distinctly transmitted to subnormal ears with wonderful benefit to hearing and health alike. The makers offer an absolutely free trial for 10 days to any person who may be interested, and a letter will bring one of these remarkable aids to your home for a thorough and convincing test. Send them your name and address today.—Adv.

# So attractive-looking... yet unpopular! Can it be "B.O."?

(Body Odor)

SLIM! Stylish! Chic! Laura was stunning in her lovely, new frock. But what did it avail her? Men admired Laura's smartness—but they avoided her company. Women openly envied her beauty, but secretly pitied her. Yes—another case of "B.O."—Body Odor! And Laura never suspected it until a newspaper ad aroused her suspicions. "B.O." isn't hurting Laura any longer. She keeps perspiration odorless now—easily, too!

# Now—no fear of "B.O." even in hot weather

We can't always tell when we're guilty of "B.O." We become insensitive to ever-present odors. But pores give off as much as a quart of odor-

causing waste daily. And the hotter the weather—the more danger. It's best to play safe—always! Just bathe regularly with Lifebuoy's deodorizing toilet soap that millions use. Refreshing, invigorating, marvelously cleansing, its gentle antiseptic lather is like a tonic. Pores are purified so deeply that "B.O." stays away. Lifebuoy's pleasant, extra-clean scent that vanishes as you rinse, tells you it purifies.

# Try Lifebuoy Free

To try this delightful toilet soap without cost, just send your name and address. By return mail, you will receive two full-size cakes of Lifebuoy free. Write today to Lever Bros. Co., Dept. 513, Cambridge, Mass.
